**BANKS WILL LEND STATE \$5,000,000**

Eight North Carolina and Four New York Banks To Take Care of State's Needs at 6 Per Cent

Raleigh, May 16.—Eight North Carolina and four New York banks have agreed to lend the State of North Carolina \$1,200,000 and to renew notes aggregating \$3,800,000 which come due May 25th, Governor Gardner and State Treasurer John P. Stedman, announced today.

The total issue of \$5,000,000 will carry an interest rate of six per cent. The new \$1,200,000 is for general fund use as was the original \$3,800,000.

The Chase National Bank of New York, which has not been listed as lending money to the state for the last 10 years, will take \$1,000,000 of the next issue.

**Corn And Pork Again Shows Profit**

A net profit of 53 cents a bushel for 463.5 bushels of corn fed to 75 head of hogs was the returns figured by a group of four farmers in the Fountain community of Pitt county. "About February 15, four farmers living near Fountain in Pitt county weighed 75 hogs and placed them on full feed in preparation to make a co-operative carlot shipment," says W. W. Shay, swine extension specialist at State College. The demonstrations were in charge of County farm agent E. F. Arnold of the State College extension service and the local vocational teacher. The hogs were sold at various times at prices ranging from \$4.90, the top price on March 28, to \$3.75 a hundred, which was the top price one month later on April 28.

"During the feeding period, the hogs gained 8,421 pounds at a feed cost of \$211.08 or an average cost per animal of \$2.50 a hundred pounds. The corn was charged at 35 cents a bushel, cotton-seed meal at \$20 a ton and fish meal at \$42 a ton. After paying the cost of this feed, and all transportation charges, the hogs returned to their owners 53 cents a bushel for the 463.5 bushels of corn eaten and left \$114 worth of plant food for the labor of feeding. Had the corn been sold from the farms as grain, it would have taken \$70 worth of plant food with it."

Mr. Shay says it is hard to find profit from any kind of farm enterprise at this time but usually corn may be fed to hogs and return an income much above what would have been received had the corn been sold as grain. In the above case, he says, the feeding operation paid a 60 per cent return. Some farmers find it hard to sell their corn as grain but there is nearly always a market for fat hogs, well finished and in good condition. Cheap corn may be converted into pork, the farm program balanced, the plant food kept on the soil and some cash secured in the operation, he concludes.

**Timely Questions And Answers**

Q. How can I control insects and diseases of my late cabbage and Irish potatoes?

Ans. Potato bugs and diseases affecting the crop can be controlled by spraying or dusting with poisoned Bordeaux. The first application should be made when plants are about three inches high and should

be repeated every two weeks until plants begin to die. Where no disease is present, dusting with calcium arsenate will control the bugs. For cabbage worms the arsenate of lead spray or dust is recommended and for cabbage aphids the best remedy is a spray of 40 per cent nicotine sulphate. Directions for making these applications may be obtained from the farm agent or by writing the Department of Entomology at N. C. State College.

Q. When is the best time to apply a side dressing of nitrogen to cotton?

Ans. Cotton should be side dressed at the first cultivation immediately following chopping. Experiments show that applications made at this time are the most profitable both for the plant growth and fruiting.

Q. When is the best time to side dress corn?

Ans. Corn should be side dressed when it is about knee high. Applications of nitrogen made when the corn bunches to tassel will deepen the color and increase the growth of stover, but the yield of grain will not be increased as much as from earlier applications.

Q. How much Certified Lespedeza

seed was produced in North Carolina last year?

Ans. One million pounds or forty thousand bushels were produced and certified as being true to type and

variety and free from dodder and weed seeds. All seeds, above the need of the growers, has been sold at a premium above the price of uncertified seed.

**GOOD NEWS JUST ARRIVED**

New shipment of ladies' and men's Spring Shoes. Lot includes latest styles for sport wear and for formal dress. Men's sport Oxfords in a variety of shades.

**MEN, YOU MUST SEE**

Our new Spring Suits! The latest in style. Browns and Serges.
