Advertising vs. Bankruptcy

A trade publication points out that, according to Bradstreet's report for 1930, 95 per cent of all business failures were non-advertisers. One does not hesitate a minute about insuring his home or place of business, but how about the business itself?

The successful business man is the one who goes after business, the failure is the one who sits around and waits for business to come to him. Bradstreet's percentage shows that the going business man is an advertiser.
