It Takes More Than Ink and Paper To Turn Out GOOD PRINTING

Almost anyone, with a little experience, can set type and turn out job printing, but the results would hardly be pleasing to you, Mr. Prospective Customer.

For it takes far more than ink and paper to turn out printing that would be a credit to you and your business.

To turn out quality printing a number of things must be taken into consideration. First, there's the man who sets the type. He must know his job thoroughly; must use good judgment in selecting the style and size of type that will give the best effect. Then there's the pressman, upon whom rests the entire responsibility for the looks of the job. No ragged or blotted lines, no slurred letters must be allowed. The printed sheet must be clean and neat.

Quality printing also depends upon the paper and the ink. A cheap grade paper may spoil the appearance of the entire job. An inferior ink can do the same.

We use only the best. Our printers are experts and take pride in the jobs they turn out.

We do quality printing.
