At eleven-fifteen a "bread line" was formed to the "relief station" where coffee and sandwiches were served in good depression style from an oilcloth covered table.

Benham News

Owing to the bad roads and weather the people of this community did not have many visitors during the holidays.

Luther Brown, of Detroit, Mich., spent the holidays here visiting friends and relatives. He was formerly of this community. Everyone seemed glad to see him. He returned Monday to Detroit where he holds a position with a florist of that city.

Mr. and Mrs. Quincy Brown, of Winston-Salem, visited Mr. Brown's parents, Mr. and Mrs. John O. A. Brown during the holidays, going from there to Ashe county to visit Mrs. Brown's parents, Mr. and Mrs. Seavers.

There is quite a lot of sickness throughout the community, but we are glad to note that in most cases there are signs of improvement.

We are under the impression that times are picking up. We understand that Walter Brown is installing a large water mill and water system. Walter now thinks the only drawback will be having to climb a forty-foot pole to crank her up, but we wish him success in his work and hope that he will not have to

wear out his trousers climbing a pole.

Lonnie Ledbetter visited Millard Brown Saturday night.

Mr. and Mrs. Tyra Gentry had as their guests Sunday Mr. and Mrs. John Thomas, of Winston-Salem, also Ernest Myers and Lonnie Ledbetter, of Benham.

M. L. Myers, Sr., who fell Christmas day injuring his hip, is improving and hopes it will not be many days before he will be able to get out again.

A device that counts grains of sand for analysis of sediments has been perfected by J. E. Appel, University of Chicago geologist.

in traffic, and power on hills, you'll find the new Sinclair Regular meeting your every demand! Use this amazing gasoline for 30 days and see how much better your car performs—how much easier it is to handle.

NOTE: For best results use either SINCLAIR OPALINE MOTOR OIL or SINCLAIR PENNSYLVANIA MOTOR OIL. Both have been de-waxed and also freed from petroleum jelly at as low as 60° F. below zero.
