PAST WEEK

SHIP SINKS

One hundred and eighteen persons, victims of the first Great Lakes disaster of the season, returned to shore at Houghton, Mich., Sunday afternoon after a night spent in the cold fog of barren Rock of Ages reef in Lake Superior following the grounding and wrecking of the passenger steamer George M. Cox late Saturday.

INJURIES ARE FATAL

Dr. William Joseph McGlothlin, president of Furman university, Greenville, S. C., died in City hospital Sunday of injuries suffered in an automobile wreck May 16. He was 65 years old.

ANOTHER FOR REPEAL

Tabulation of nearly complete returns Sunday indicate Nevada voted overwhelmingly for repeal of the 18th amendment at Saturday's primary election.

HUGE UTILITY INTERESTS

An uproar, precipitated by a demand from Virginia's quick speaking Senator Glass to know the goal of the inquiry into J. P. Morgan and company, climaxed a disclosure Friday that the firm had an interest in utility concerns whose territory embraces almost half the population of the country.

SANFORD BOY DROWNS

John Allen Bryant, 17, lost his life by drowning at Morris pond, nine miles south of Sanford, about two o'clock Friday afternoon. The first to enter the water of a party from Sanford, young Bryant ventured too near the dam and got into water over his head. His body was recovered.

MUST PAY FIRST, TALK LATER

France's defaulted war debt installment must be paid before President Roosevelt will consider any revision of that country's obligation to the United States.

BEST WEEK IN THREE YEARS

Trade and business during last week, the Dunn and Bradstreet Review said Friday, have shown more consistent improvement than in any week in the last three years.

WANTS "GOLD CLAUSE" OUT

The administration called on Congress Friday to strike the "gold clause" from all obligations, public and private, thus making all American money legal tender in payment of debts.

MAY PROBE MELLON

A report from the secretary of the treasury on the income tax assessments and payments by Andrew W. Mellon, former secretary of the treasury, and a number of companies allied with the Mellon fortune from 1917 to 1933, was demanded Monday in a resolution introduced by Senator McKeller, Democrat, Tenn.

ATTEMPT FAILS

Judge P. A. McElroy today denied a petition for an injunction against the holding of an election in McDowell county June 27 on the question of legalizing pari mutuel betting on horse racing there.

PREDICT 15-CENT COTTON

G. C. Adams, Georgia's commissioner of agriculture, Monday predicted cotton would be selling at 15 cents a pound by the end of the year.

F. D. R. BEHIND INVESTIGATION

President Roosevelt told members of the Senate banking committee Monday he wanted their investigation of J. P. Morgan and company and other private bankers to be pushed forward "without limit."

FAIR DRAWS THROUG

Attendance figures, although incomplete and unofficial, showed more than a third of a million persons witnessed the world's fair during its first two days, at Chicago.

MAKES \$10,000,000 CHICKEN FEED

J. P. Morgan and company's report to senate investigators show the firm made nearly \$10,000,000 on sale and underwriting of securities in 1930-31, years in which the bank's partners paid only \$48,000 income tax to the United States.

Home-Coming At Cool Springs Church

The Cool Springs Baptist church five miles northwest of this city, announces a Home-Coming Day for Sunday, June 11, 1933. All former members and pastors of the church and members of their families are most cordially invited to attend. They are requested to bring a well filled basket, also flowers for the grave of a loved one.

Which Do YOU Want....
MERE COLDNESS

OR

SAFE Refrigeration

SAFE refrigeration surely requires more than mere coldness. Indeed, what good is low temperature if you have to keep your foods stored in foul, stagnate, unbreathable air.

We challenge anyone to successfully contradict the statement that the air in any good ice refrigerator is purer, more breathable than in any type of ice substitute refrigerator sold for home use. This is true because as ice melts it "washes" the air that circulates in the refrigerator and food odors—always present where food is stored—are carried down the drain pipe, out of the refrigerator.

No refrigerator without a drain pipe—or some system of ventilation—can take the food odors away from the food. In any ice substitute refrigerator these odors are kept shut up with the foods and intermingle and sour. Isn't it to be expected that foods kept in such an atmosphere would lose their natural flavor and goodness?

Equally important from the standpoint of safe refrigeration is the amount of moisture in the air. Melting ice supplies the right amount of moisture for the protection of foods. This moisture keeps vegetables and fruits in better condition just as cold, pure water lengthens the life of cut flowers.

Ice refrigeration always has been the lowest price refrigeration you can buy. If economy were its only advantage, perhaps you might feel you could afford the more expensive kind. But no matter what price you pay, only ice can give you the best refrigeration.

--- TRY THESE TESTS ---

THE BREATHING TEST

Kneel down in front of any ice substitute refrigerator in which foods have been shut up for 12 or more hours and smell the air that rushes out at the very bottom of the door as you open it. Make the same test in front of any ice refrigerator and decide for yourself in which refrigerator the air is purest.

THE MELTING ICE TEST

In any ice substitute refrigerator freeze a tray full of ice cubes. Allow these cubes to melt, in the tray, on the shelf of the ice substitute refrigerator in which foods are stored. When the cubes have melted, freeze them a second time and allow them to melt again in the same way.

When they have melted the second time you probably will notice a thin layer of film on the top of the water. This film is made up of substances taken from the air in the ice substitute refrigerator. In any ICE refrigerator these substances are drawn away from your food, taken down the drain pipe out of the refrigerator. If you think the water under the film (this film may be very thin and almost unnoticeable; additional freezings and meltings will make it more pronounced) is pure, take a small taste of it.
