

HAPPY DAYS HERE AGAIN FOR FARMERS

Freeman Gives Example of How Emergency Farm Act Works

R. A. Freeman, secretary-treasurer of the Dobson National Farm Loan Association tells an interesting story of how the new Emergency Farm Loan Act is operating to help distressed farmers who owe money and can't pay it or who are about to be foreclosed.

A month or two ago a certain farmer in Surry county applied for a loan of \$2,500.00. He owed a certain life insurance company about \$1,600.00 and the local bank about \$1,000.00. The land bank approved his application for \$1,700.00. This was enough to pay the insurance company, who had put their mortgage in the hands of attorneys for foreclosure, and who were ready to proceed to sell him out. The Land Bank knew this, and called the Secretary-Treasurer up over long distance from Columbia, and asked him who the farmer was going to get enough money from to pay the local bank on its second deed of trust. On reply that he didn't know where he could get the money, the Land Bank says, "let us lend him enough money on a second mortgage through the Farm Loan Commissioner under the New Act of Congress to pay up his entire indebtedness, and put him on the Amortization Plan, under which he will not have to pay any part of his principal for the next five years and he will have to pay only four and one-half per cent on his entire indebtedness, and will not run the risk of being foreclosed under a second mortgage within a year by the holder of the second mortgage." The Secretary-Treasurer replied that that would be just fine. The land bank said if you will have this farmer and his wife in your office Monday morning at nine o'clock, May 29th, we will be there and close his loan on the first mortgage and on the second mortgage at the same time and put the farmer on his feet again.

The officials of the Land Bank came in person as agreed and paid this farmer out of debt last Monday and put him on a plan under which he can pay straight four and one-half per cent interest and no part of the principal for the next five years, and prevented his farm from being sold. This was done the second day after the New Emergency Act went into effect. This is a concrete example of how the New Emergency Farm Loan Act operates to save distressed farmers. This was the first loan made under the Act in the state of North Carolina. It looks like that "Happy Days Are Here Again" for the farmer. There is no reason now why any good farmer should lose his farm if he will apply for relief to the Federal Land Bank under the recent act passed by the Roosevelt Administration.

Only The Leader of the Oil Industry Dares Stand Back of Such a Guarantee

AT REGULAR GASOLINE PRICE

Essolene

Guarantees

SMOOTHER PERFORMANCE

The worth of a guarantee depends upon who makes it. Back of the guarantee of smoother performance you get with Essolene is the Standard Oil Company of New Jersey. This Company fully understands the importance of such a public guarantee when made by the world's largest oil organization. We mean exactly what we say when we make it. If you expect Essolene to be advertised with ex-

travagant claims that offend common sense you will be disappointed. Our only statement is that this company stands squarely behind Essolene as a great advance in motor fuel—a new standard of quality for other gasolines to attain. Try Essolene today. Be your own judge. Compare it with any fuel you have ever used. A single tankful will convince you. Colored Orange to Prevent Substitution

Essolene, Esso, and Esolube—the 5-Star Motor Oil, are sold at Esso Stations and Dealers owned, operated or supplied by the following companies: the Standard Oil Company of New Jersey, the Standard Oil Company of Pennsylvania, the Standard Oil Company of Louisiana, and the Colonial Beacon Oil Company, Incorporated.

WOMEN'S CONTRIBUTION TO THE MOTOR CAR

There is some doubt that people care to hear very much about what goes on under the hoods of their cars.

The driver knows that "driving qualities" are not accidental; they are put there. How the manufacturer creates or evolves those results may not interest him. He judges entirely by the results he gets in driving.

Well, it is not essential to talk "shop"; let us talk Results.

Smoothness. Drive the Ford V-8 and you will find that the engine runs with surpassing smoothness, due to its design and the extra precise methods of its manufacture.

Power. There it is, 75 horsepower (we could say 80) at the drive-shaft for the driver's use. With less weight to pull around, the mettle of this car—its life-like response—is rather remarkable.

Economy. Our V-8 develops more power on a gallon of gasoline than any car we have made. Mileage is partly a matter of individual driving, but under average conditions the Ford V-8 does 17 to 20 miles a gallon. Of course, car economy is not only a matter of fuel. Ford V-8 has that too, but it is also economical in the complete sense—initial cost, operation, maintenance.

Appearance. This is woman's contribution. The motor car must not only be useful, but also good-looking. View the Ford V-8 and you will not need our comment on its fine appearance.

Comfort. This also is woman's concern. In 30 years she changed the motor car from a wagon to a coach. Comfort is a quality made up of numerous ingredients. There is no comfort without a quiet, smooth-running engine. We have all the other ingredients too,—color, good taste, quality, ease, safety, roominess and convenience.

Henry Ford
