**FIVE** big men can relax in utter comfort on the deep cushions of the Ford V-8. Wide seats keep elbows out of ribs. Ample leg room keeps legs from being cramped.

Why? Because Ford measures roominess in terms of *usable* body room. *Not* in terms of the distance between bumpers, which means *nothing* when you come to analyze it.

The Ford V-8's very engine construction gives you more body room, as the diagram explains. Cylinders are "doubled-up" saving space, not strung along in a line to waste it.

The Ford V-8 front seat is adjustable. It quickly and *easily* adapts itself to a six-foot-two husband or a five-foot-two wife. It ends forever that source of strife.

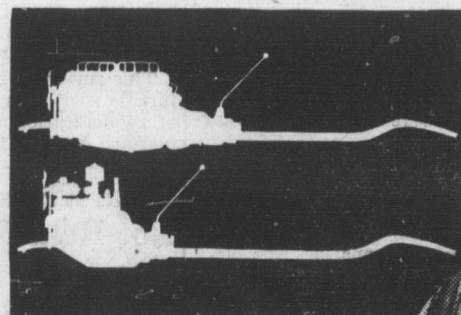

See the new Ford V-8. Revel in its comfort. Marvel at its performance. And drive it before you buy *any* car at *any* price.
