Certificate Awarded By Better Homes And Gardens Magazine

Mrs. R. C. Woodruff, of Elkin, has just been awarded a Certificate of Recipe Endorsement by Better Homes & Gardens for her recipe, "Apple Sauce Cake."

This certificate, which brings national recognition to Mrs. Woodruff is given by Better Homes & Gardens only for distinguished recipes which pass its kitchen's tests for dependability, excellence of taste, and family usefulness.

In awarding these certificates, it is the magazine's aim to provide proper recognition for the creative work done by women in their own kitchens, and also to raise the standard of accuracy and dependability of recipes as a whole. No other magazine or institution gives this personal recognition and service to its subscribers.

### To Make Check Of Contracted Acreage

Cotton and tobacco growers who are under reduction contracts are being cautioned by Charles A. Sheffield of State College to make careful measurements of their planted and rented acres.

He is also urging them to designate which acres have been set aside from cotton or tobacco production so that committeemen who will make a check of the acreage can do so as rapidly as possible.

It will be to the farmers' advantage, he said, to have their production as nearly in line as possible. Growers who have planted more than their contracts allow will be required to reduce their acreage or cancel their contracts and refund any rental payments they have received.

After the committeemen have made their check, government surveyors will make a recheck of a few farms chosen at random to determine the accuracy with which the first check was made. Corrections will be made when necessary.

The check will also be made to determine whether the growers have retired from production land which is of good average fertility and whether they have planted on the rented acres any crops which are prohibited under the contracts.

Farmers who are not complying with their contracts in every way will be given a chance to do so. If they do not bring their farms into compliance, their contracts will be forfeited.

Due to drought conditions in the middle west, the contracts have been modified so that a grower can plant forage and feed crops on all the rented acres. He may also grow for sale such crops on non-rented acres, says Sheffield.
