Immediately after the wedding

How Cardui Helps Women To Build Up

Cardui stimulates the appetite and improves digestion, helping women to get more strength from the food they eat. As nourishment is improved, strength is built up, certain functional pains go away and women praise Cardui for helping them back to good health. . . . Mrs. C. E. Radtiff, of Hinton, W. Va., writes: "After the birth of my last baby, I did not seem to get my strength back. I took Cardui again and was soon sound and well. I have given it to my daughters and recommend it to other ladies." . . . Thousands of women testify Cardui benefited them. If it does not benefit YOU, consult a physician.

Nicks, Hamptonville; Mrs. Laurice Weatherman, Yadkinville, and George Sprouse, Jonesville.

After fire destroyed his house, W. R. Hopkins, of Alameda, Tex., made his water tank over into a two-story home.

TOBACCO PROGRAM TO BE CONTINUED

4-Year Tobacco Adjustment Contract Will Be Offered

A four-year tobacco adjustment contract, covering the years 1936-39 inclusive, will be offered this summer to flue-cured tobacco growers in North Carolina.

The new contract, in effect, will be a continuation of the present program, said E. Y. Floyd, of State College. A few minor changes will be made, he added.

The new contracts will be established on acreage and production bases already determined for the present contracts. Adjustment of acreage and production during any one year will not be more than 35 percent of the base.

After the sale of the crop each year, the adjustment payment will be determined by the amount required to make up the difference in

the actual farm price received and the established parity price on the domestic portion of the crop.

Where necessary, adjustments in the base acreage and production figures will be made in the contracts to place all growers on as equitable a footing as possible, Floyd stated.

The new contract provide that the number of tenants and share-croppers on the farm and the percentage of the tobacco grown by tenants and share-croppers may not be reduced below the number and percentage in 1935.

To encourage soil improvement, the contracts provide that an increase in the amount of land devoted to soil building crops may be made on the farm equal to the number of acres withdrawn from tobacco cultivation under the contract.

Any grower who wishes will be allowed to terminate his contract at the end of any year during the 1936-1939 period.

TO PURGE UNIONS

Atlantic City, N. J., Aug. 4.—A hint that the American Federation of Labor would start a drive to purge its unions of communist influence

came tonight from William Green, president.

While the federation's executive council was assembling here for the third of its quarterly meetings, Green

in a statement said that the council "in all probability" would "deal vigorously and most directly with the communist developments in the Fur Workers' union."
