"SNOW WHITE" IS COMING TO ELKIN

Famous Full-Length Cartoon Feature to Be Shown at Elk Theatre

TO BE HERE THREE DAYS

Walt Disney's first full-length Technicolor feature, "Snow White and the Seven Dwarfs," will be presented by the Elk theatre here three days next week, beginning Monday and showing through Wednesday. Matinees will be staged daily, with the Monday show beginning at 10:20 a.m. for benefit of Fourth of July crowds.

In production for three years, and costing a million and a half dollars, "Snow White" is expected, to establish a standard for future animated features in much the same manner that "The Birth of a Nation" influenced the epic cycle that followed.

The Disney picture is a drastic departure from previous technique in the animated field, in that living, credible beings have been created in the persons of Snow White, the seven dwarfs, the queen, the prince and other characters in the famous Grimms' phantasy. In addition, the art treatment departs radically from cartoon expression. An illusion of depth has been added through the use of the multiplane camera, an invention perfected by Disney technicians. This new camera treatment makes three-dimensional figures out of characters drawn in a two-dimensional medium.

Added interest attaches to the eight musical numbers in the feature, the outstanding one being "Hi-Ho," a marching song sung by the dwarfs.

The story relates the adventure of a beautiful young scullery maid whose youth and charm arouse the envy of a wicked Queen, who plots in various ways to get rid of her forever. How the Queen nearly succeeds after seeking out Snow White in the latter's refuge among seven kindly dwarfs, and how the little heroine is finally rescued by her Prince Charming is pictured with exquisite artistry and humor combined.
