FATAL DISEASE STRIKES CATTLE

Nearly Two Hundred Yadkin Cows Vaccinated Against Hemorrhagic Septicemia

THREE COWS ARE DEAD

In an effort to prevent the spread of a form of blood poisoning known medically as hemorrhagic septicemia, which last week killed three cows in Buck Shoals township, Yadkin county, 192 cows of that section have been vaccinated in a effort to prevent the spread of the disease. The serum was obtained from Greensboro by Assistant County Agent R. A. McLaughlin.

A heifer and two milk cows belonging to Mrs. Harvey Wood died in less than 24 hours after being afflicted with the disease. The heifer, which won first prize at the Winston-Salem Fair last fall, died about 10:30 o'clock at night. The cows were milked as usual the following morning but one was dead at 10 o'clock and the other at 5:00 in the afternoon.

The disease, sometimes called "shipping pneumonia," is highly fatal.

Belladonna the scientific name for the deadly nightshade means "Beautiful Lady."

Dolcini—Is your baby still in rompers?
Palmetto — Well, she's still when she sleeps in them.

"I understand your job as the human cannonball at the circus is very discouraging."
"Yes, I get fired every day."

FACTS FAVOR FORD

1 The 1939 Ford V-8 is a beautiful, modern motor car. Its 85-horsepower engine gives you economical, well-balanced performance over the entire speed range — and the 60-horsepower engine is even more economical.

2 The structural strength of the Ford car — frame, bracing, axles, body — makes not only for safety, but durability and long life.

3 Ford hydraulic brakes are exceptionally large and strong in proportion to car weight.

4 The Ford car is stabilized for comfortable riding. Its springbase, the distance between front and rear suspension, is 123 inches. Seats are toward the center, perfectly balanced. The car does not bob or dip and can have very little sway.

These four points — power, strength, safety, comfort — are by far the most important essentials in any motor car. They form the basic value of your investment.

With this solid foundation to build on, the Ford V-8 has been made beautiful, spacious, easy to drive. It is richly upholstered and has all the modern features which add to the luxury and pleasure of motoring.

You can see these things when you take a trial drive, but do not forget that the main value is in the things you do not readily see — quality of materials, precision of manufacture, fundamental engineering.
