

## IS TO SPEAK AT EAST BEND

Dr. Pegg Will Talk on Control, Treatment and Effects of Syphilis

## IS TO SHOW PICTURE

On Friday night, June 16, Dr. Pegg, of the 4-County Health Department, will speak at East Bend on the control, treatment, and effects of syphilis. This lecture is a continuation of several such talks made by Dr. Pegg throughout the four counties of Forsyth, Stokes, Yadkin and Davie, and is a furtherance of the drive being put on by the state of North Carolina and the entire nation for the control of this scourge to the human race. The lecture will be held in the East Bend school building.

Dr. Pegg's talk will consist of a practical discussion of the ways in which the disease may be spread. He points out that one

doesn't have to come in direct contact with a person in order to get the disease, but that it may be caught by drinking after an infected person, by smoking the same cigarette, or handling articles containing the germs, and in many other ways.

The discussion will be an open one in which the lecturer will give the audience opportunity to ask questions as to the dangers, effects, control, and treatment of the disease.

No child under 12 years of age will be admitted to the lecture. In connection with the program a vitaphone picture will show the different phases of the disease, and also many other interesting facts pertaining to its spread, effects, and control.

In addition to the picture there will be two others, "Donald Duck and Mickey Mouse," shown for entertainment.

This same lecture-picture program has met with great success wherever it has been shown. In Stokes county the Woman's Club sponsored the program; also in Yadkinville the Woman's Club sponsored it.

Mrs. Jamie Leake Messick, one

of the Yadkin county nurses, says that if there is any community in the county that wants this program to get in touch with her at East Bend.

It was also announced by Mrs. Messick that she will hold a clinic at Dobbins school house three miles west of Boonville at 2 p.m. Thursday for typhoid vaccination. One case of typhoid has been reported in this section and it came from a family none of whom had been vaccinated in recent years for the disease. This clinic is for the people in this immediate community. If there are others who wish to have the vaccination, although it is an off year for typhoid vaccinations, they may receive it by going to Mrs. Messick's office at Boonville any Monday morning, or to Miss Niblock's office at Yadkinville any Monday afternoon, from 1 to 4.
