

## HEALTH DEPT. ACTIVE YEAR

Approximately 50,000 Appointments Made During Past 12 Months

### REPORT IS ISSUED

The annual report of the activity of the Surry county health department during the year just past has disclosed that approximately 50,000 appointments were made by the department during the year. The report was released by Dr. R. C. B. Franklin, county health officer.

The itemized report of all activity during the year disclosed

that it was one of the most active years in the entire history of the department.

Heading the list of immunizations made by the department is the 5,135 typhoid tests followed by 4,286 tuberculin tests, 1,904 diphtheria and 1,190 smallpox.

Gonorrhea headed the list of contagious diseases reported last year with a total of 131 cases to its credit. There were 101 measles cases, 130 syphilis, and 65 scarlet fever.

Hundreds of visits were made by the staff of the health department caring for maternity and infancy cases. Forty persons were admitted to the birth control service during the 12 months.

Over 7,215 school children of the county were inspected by the staff of the department.

Veneral diseases headed the lists of clinic visits by patients during the past year as over 10-

250 visits were made by persons suffering from the diseases. Total detention notices served by the department amounted to 22.

Tuberculosis treatment is one of the major problems of the county health departments as revealed by the figures on tuberculosis work. There were 798 admitted for service, 104 admitted to nursing service, 791 physical examinations, 806 X-ray examinations, a total of 943 clinic visits, and 28 persons were admitted to sanatoriums.

Syphilis specimens headed all others made by the department last year which included 71 water, 217 milk, 788 gonorrhea, 2796 syphilis, 31 tuberculosis, and others which totaled less than 50 each.

General sanitation work amounted to a larger proportion of the work than any year previous by the Surry department.

Slaughtering cows under supervision of the sanitary division of the health department service netted 1024 cows for Surry county food in perfect condition last year. Officers of the department condemned eight cows' carcasses and refused permission to sell.

In closing the report officers of the office traveled 20,887 miles, spent 3,686 hours in the office, and 4,115 hours in the field. Over 2,300 bulletins and posters were distributed during the year.

Growing year by year, the Surry Health Department is already considering enlarging its quarters over the City Hall, but no plans have been announced.
