ROSCOE, THE ROASTBEEF'S NARROW ESCAPE

"Gosh," says Roscoe, "that was close. Here I come round and rosy from the butcher shop—and I nearly land in one of those refrigerators that surround a fellow with dry air—and suck the rich juices right out of him. I'm heading straight for a modern air-conditioned ICE refrigerator—where I'll get the treatment a fine roast like me deserves."

Right you are, Roscoe. In the modern ice refrigerator, proper moisture guards all foods against rapid drying out—just as clean-washed air protects them against flavor taints.

And these amazing 1940 ice refrigerators have many other advantages you ought to know about—including the fact that they cost only a third to a half as much as other types. Talk to one of our Service Men or call at our showrooms. Ask about our easy terms and free trial offer.
