Farmers Faced with Situation More Serious Than in 1930-32

SEEK 3-YEAR CONTROL

Faced with a market situation more serious than that of 1930-32, flue-cured tobacco growers of North Carolina and other Southern states will go to the polls July 20 to vote on a three-year control plan.

Recent amendments to the quota provisions of the AAA program have authorized this referendum, which, if voted on favorably by a two-thirds or more majority, would set up quotas on the 1941, 1942, and 1943 crops. Heretofore, growers have voted on only their next crop.

E. Y. Floyd, AAA executive officer of N. C. State College, said any loan arrangements to support the market will depend upon a decision by growers to regulate marketings. A majority vote against quotas would automatically eliminate any government loans.

If quotas are voted for three years, the AAA executive officer explains, domestic manufacturers can pay fair prices for their tobacco without fear of excessive production during the period. Then, too, the export trade will be more likely to make purchases at reasonable prices, and the government can give maximum support to prices for the export grades.

Probably the greatest factor in the present distressed situation is the 1939 crop, which was grown without regard to allotments. Flinging caution to the winds, growers earned a 1,160,000,000-pound crop, 34 per cent. higher than the previous record crop of 1937. The result was a 400,000,000-pound surplus.

The second reason, and perhaps almost as great as the overproduction factor, was the loss of or the seriously curtailed foreign markets as a result of the

The Job Is Being Done!

North Carolina law officers, accepting the help of the Brewers and North Carolina Beer Distributors Committee, have established a worthy record of weeding out the minority of objectionable beer dealers.

This program of industrial cooperation in law observance is continuing—without "fuss or feathers." Quietly, earnestly, the North Carolina Beer Industry is carrying out its "clean up or close up" pledge.

The dealers who will not be fair to their industry and their state are becoming fewer and fewer. We know, and so do they, that the job is being done.

The public can help by patronizing only legally operated places where beer and ale are sold—and by reporting any objectionable conditions to . . .
