**SPOOL CRYSTAL FOR THOSE WITH A MODERN IMAGINATION**

Long ago, an early American designer dreamed of spool turnings as a motif for colonial furniture. His conception started a fashion, the popularity of which has remained to this day.

Postoria developed the idea, and shaped molten glass along similar lines; producing Spool crystal pieces as lovely as they are unique. Each lucent fluting is like a convex mirror that reflects surrounding colors dancing in silver pools.

Spool crystal is a daring conception. It has captured the imagination of those who admire old traditions made up in a modern manner.

Pictured above are the new Spool floating garden, vase and compote. There are many other pieces for your selection; available in clearest crystal, Azure-Tint or Gold-Tint.
