

Come Here by Your Lonesome
Or come with a friend.
There'll be none molest you,
None to offend.
Of course, two is company,
And three is a crowd.
But as to the Personnel of our
Patrons,
We're extremely Proud!
YOU ARE INVITED

Candy Palace

J. G. LaFares, Prop.

ANNOUNCEMENT

WE have secured the agency
for the exclusive sale of
B. P. S. Products in this locality.

Before putting in a stock of
B. P. S. Paints and Varnishes
we were fully convinced that
B. P. S. really stands for

Best Paint Sold

B. P. S. Products are sold
in easy-opening, light-shutting,
slip-top cover cans, which gives
you the opportunity to

INVESTIGATE BEFORE INVESTING

We will be glad to open
up a can and show you the
paint itself.

Estimates, color cards and
other information on request.

FAMILY AVOIDS SERIOUS SICKNESS

By Being Constantly Supplied With
Theford's Black-Draught.

McDuff, Va.—"I suffered for several years," says Mrs. J. B. Whitaker, of this place, "with sick headache, and stomach trouble."

Ten years ago a friend told me to try Theford's Black-Draught, which I did and I found it to be the best family medicine for young and old.

I keep Black-Draught on hand all the time now, and when my children feel a little bad, they ask me for a dose, and it does them more good than any medicine they ever tried.

We never have a long spell of sickness in our family, since we commenced using Black-Draught."

Theford's Black-Draught is purely vegetable, and has been found to regulate weak stomachs, aid digestion, relieve indigestion, colic, wind, nausea, headache, sick stomach, and similar symptoms.

It has been in constant use for more than 70 years, and has benefited more than a million people.

Your druggist sells and recommends Black-Draught. Price only 25c. Get a package to-day. N. C. 123

CHOICE CUT FLOWERS

For all occasions, Roses, Carnations, Violets and Vallies the leaders. Our art in wedding arrangements are of the latest touch. Nothing finer in floral offerings to be had. Blooming pot plants, azaleas, lily cuttings, palms, ferns, Norfolk plants and many other nice pot plants.

Rose bushes, evergreens, shrubs, ferns, hedge plants and shade trees. Mail, telegraph and telephone orders promptly executed by

J. L. O'Quinn & Co.
Phone Store 42, Greenhouse 142
RALEIGH, N. C.

D. J. Whitehead, Jr.
Agent for Greenville and vicinity.

We are the manufacturers of the Nelson Patent Double End Tobacco Cans, and are prepared to furnish you with any quantity. This is the only tobacco can on the market that you will not doubt need one or more when you are out on a long drive. We will be glad to show you this can if you will call at our office. You can handle these cans with the same ease as you handle any other make. For prompt delivery of your order in any quantity, write to us. We also handle the GARDNER PATENT TOBACCO CANS. GREENVILLE, N. C.

World's Largest Apartment House.

A. F. Leicht, architect of this city, states that his home town, Newark, N. J., will soon boast of the largest apartment house in the world. Ground has been broken for a building to be 13 stories high in front and 15 stories in the rear. The building will be located at 742-48 High street, with a frontage of 105 feet on that street and a depth of 225 feet. The construction cost will be \$850,000. A lane from Spruce street to the rear of the building will run to a private garage, capable of accommodating 100 automobiles. There will be a palm room, a social room, a ballroom and a restaurant on the thirteenth floor. The restaurant will accommodate 400 diners at one time. A roof garden, covering the entire structure, will be a feature of the building.—Wall Street Journal

PEST OF THE WEST INDIES

Planters Wage War Against Species of Crabs That Are Destructive to the Vegetation.

A curiously destructive pest of Grand Cayman island of the British West Indies is found in certain species of crabs. They not only partake ravenously of everything edible, but their burrows do great damage, and they fill these burrows with every kind of stolen small articles. A bulletin of Kew Gardens notes that such utterly useless objects as knives and pocket compasses are hidden away.

Eggs from under a setting hen are devoured, if not the hen herself, and so many leaves of seedling coconut trees are eaten that 6 to 10 per cent of the plants may require replacing in newly cleared ground from which the crabs have been thoroughly thinned out. Patches of thin soil in the bush become covered with vegetation after the complete driving away of the crabs. They shut themselves underground in the early part of the year to change their shells, and for their barricades of sticks and rubbish they nip off or root up saplings three quarters of an inch in diameter. Another reprehensible characteristic less harmful to the planter, is cannibalism.

Asiatics Use Goat Skin Churns.

Goat skin churns are the proper thing in the Asiatic deserts. They are the unique butter-making contrivances of the world. These churns resemble gigantic footballs, varying in size according to the extent of the family. They are constructed of goat's skin sewed together in the form of a ball, with the hair side in. Cream is run into these bags until they are about half full, and the balance of the space is filled with air from the churner's lungs. Then these churns are suspended from three sticks and a rocking motion begun. The air on the inside is calculated to aid coagulating the butter from the cream. After the churning the product is strained through cloth for the goat's hair has a tendency to shed during the violent operations.

PLAY NECESSARY FOR CHILD

Most Important for His Proper Development, and There Should Be Safe Places Provided.

"And the streets of the city shall be full of boys and girls playing in the streets thereof." Thus Zechariah in 526 B. C. But there were fewer motor cars in Zechariah's day than there are in ours. The children now need, for their play, some place safer than the street, declares the Craftsman.

More important than the playground, however, is the play. It is well that children should play in a safe place, but it is absolutely necessary that they should play somewhere if they are to grow up at all. For there is no doubt now, I think, in the minds of educators that play builds the child. It is the method that nature has provided for his development. Play indeed is the positive side of the whole phenomenon of infancy. The reason the higher animals, and man above all, are born so helpless and unformed is that they may be finished by this special method. It is for the sake of play that infancy exists, that there is such a thing as a child at all. The child who is deprived of his chance to play is deprived of his opportunity to grow up.

Wise Answer.

"The late Bishop Bowman," said a New York Methodist, "dined one evening at a fashionable millionaire's in Fifth avenue.

"Beside the bishop sat one of those dyed, decollete, elderly woman who are always trying to be brilliant.

"This woman rattled off a lot of silly epigrams about Buddha and Mohammed, and so forth—then she turned to the bishop and said:

"What do you really think, bishop, of God?"

"The bishop answered with his calm smile:

"I think, madam, that all that matters is what God thinks of me."

Must Not Marry.

By a vote of 70 to 30 the London county council decided that if the three women physicians in the employ of the council should marry they would no longer be eligible to their positions. It was argued that a woman can not attend to her family duties and public duties at the same time. Those who voted against disqualifying married physicians pointed out that many of the most successful women teachers are married.

NEW DISCOVERY ABOUT ANTS

Scientist Asserts That the Insects Have a Regular Form of Salutation Among Themselves.

Ants have long been known for their excessive industry, but from a curious communication which has just appeared they seem to have surpassed all other insects by organizing an elaborate system of signaling.

Professor Bugnion, who has recently investigated the habits of the white ant, reports that the "soldiers" of that species give warnings or encouraging signals by knocking with their jaws upon dry leaves, thereby emitting a crackling sound. Placing some of these ants on a big plate and covering it with paper, he found that the "soldiers" among the ants responded to his taps with a rustling, crackling sound.

Moreover, apart from this audible signaling, there appears to be some inaudible form of signal, for the professor asserts that the "soldier" ants salute the worker ants.

To do this, "the insect stands firmly on its legs with the head raised and the body slightly oblique, and shakes itself for an instant with a convulsive shudder. This seems to mean something."

Iron Ore for 200 Years.

There is still a considerable amount of iron ore in the ground, as shown by a report on the world's resources presented at the International Geological congress at Stockholm. It was estimated that the total actual supply of iron ore existing in deposits that can be worked at an economic profit amounts to 22,498,000,000 long tons, representing 10,192,000,000 tons of iron.

This total would supply the requirements of the world for considerably less than two centuries, even were the present rate of output not exceeded on the average. However, the potential resources of the world not yet developed are estimated to amount to 123,377,000,000 tons of ore. The output of iron ore in 1912 is estimated at 19,000,000 tons for the ten principal countries.

Around the Old Drum Stove.

"Ever see any big snowstorm when you was young, Uncle Cy?" said the wit behind the counter.

"Sure, I did," chuckled the old man. "I seen some whoppers. I remember one where th' snow wuz six feet above my head. Yessir."

"Oh, nonsense, Uncle Cy. That's impossible. There never was such a snow."

"It's true, I tell ye."

"It couldn't have been."

"Yes, 'twas. Six feet above my head. I guess I ought to know. I wuz down cellar at th' time!"

London Times at a Penny.

On the first day that the London Times was issued at a penny (two cents), its circulation was quadrupled. Three hundred thousand copies were sold. The London Daily Mail says: "The demand is the most amazing thing that has ever been known in the history of newspapers. Four or five hundred thousand people applied for the paper in vain. On arrival at their newsagent's or bookstalls they found that all the copies had been reserved for regular purchasers."

Seaplane Lifeboats.

The British admiralty has decided that all seaplanes used by naval aviators shall carry a miniature lifeboat suspended underneath the body of the machine. The boats are to be built of cedar, equipped with two oars, a mast, and sail, and weigh only 30 pounds.

MAKES BABY-SAVING RECORD

New Zealand, in Most Important Respect, is Ahead of the United States, According to Figures.

The success of the efforts being made in New Zealand in reducing infant mortality rate, was called to the attention of Secretary of Labor Wilson in a letter from Miss Julia C. Lathrop, head of the federal children's bureau.

The rate in New Zealand, according to Miss Lathrop, is the lowest in the world and has been brought about by the efforts of the New Zealand Society for the Health of Women and Children. Miss Lathrop lauds the work of the society, and adds:

"Because of the absence of adequate birth and death registration in the United States, the infant death rate of this country as a whole is unknown, but estimates tend to show that it is at least twice the rate in New Zealand, which the registrar general of that country reported in 1912 to be 51 per 1,000.

"In view of the marked and growing interest in the preservation of infant health in the smaller cities and rural communities of the United States, I believe that the account of the methods of the New Zealand society is especially timely."

Dying Aviator's Nerve.

The power of the will to control a badly injured body was never better illustrated than in the case of Doctor Constantin, a volunteer aviator in the service of the Bulgarian army, who was fatally wounded by a Turkish bullet while sailing his aeroplane over the trenches at Tchataldja. Notwithstanding the shock, the pain and the rapid hemorrhage, Doctor Constantin kept his nerve and was able to turn his aeroplane around, guide it back to the Bulgarian lines and volplane safely down among his friends. He died as the aeroplane reached the ground.
