PREHISTORIC MAN. Three Russe That Have Loft Trages at Their Oustoms Behind Them.

Science has proofs of the existence of several prehistoric races, but any three of these have laft traces of their customs behind them. These are Ho-mo Europeus, Homo Eurafricus and Homo Europeus, The first race is ex-tinct. Its representative man resem-hied the remains of Neanderthal. His broched was low and petresting and forehead was low and retreating and his eyebrows beetled.

Probably the second race journeyed to Europe from the north of Africa. Their traces have been found on the Thames, in Moravia, and in caves of different regions.

Sergy, a close student of human origins, traces the second race to the paleolithic culture of the quaternary epoch in the south of France. In that culture analogies with Mycennean and prehistoric Egyptian civilization are found. Some families of the race may have been inspired by their adventurous and artistic instincts to wander onward out of their own land to a land specially suited to the development of their dreams of something that they had never been able to produce in their own country. The geographical conditions, the climate and the natural beauty of the land they settled in may have allured them and encouraged them to develop their rude arts. The third race, Homo Eurasicus came into Europe from western Asla, and its members were the ancestors of the modern European peoples.-

SECRET INK.

Writing Which May Be Made Invisible or Visible at Will. There are several waysin which two persons can correspond with each other unknown to even the people before whose eyes the very letter is held. Ovid taught young women when writing to their lovers they should use new milk as ink. This when dried is invisible, but by scattering coal dust or soot upon R. B. Lane, Sheriff. the paper the writing becomes legible. Ansonius adopted this method when

The New Bern Plumbing Co.

Harper's.

Diluted supports and, lemon jukes, hattags of altrate and chloride of bait or of chloride of copper write toriess, but on being heated the char-tars written with the first two be acters written with the first two be-come black or brown and the latter grown. When the paper becomes cool the writing disappears and leaves the paper blank again. Saltpeter dissolved in water and equal parts of sulphate of copper and sal ammoniae dissolved in water are two good invisible links. There are also some inks which are invisible when dry, but visible when moistaned with another liquid. Thus a solution of muriate of antimony washed with tincture of galls becomes yellow, green vitriol ink washed with the same solution turns black, nitrate the same solution turns black, nitrate of cobalt washed with oxalic acid turns blue, arsenate of potash with nitrate of copper green, solution of gold with muriate of tin purple,

The Ferocious Microbe. Life is growing too complicated for the average unleatned human being. says the Dietetic and Hygienic Ga zette. It has been discovered by medical men that birds are dangerous carriers of disease-that "even the fluttering of a canary in its cage may throw out infectiou" and that as for the companionable, impudent parrot, be often suffers from something called psittacose, which may be transmitted to the unsuspecting owner. The unfriendly germ, the vindictive animalcule, the blustering bacillus, browse on our carpets, hide in our books, hold swimming races in the water we drink. They seat theniselves by our side in the trains, invade the very clothes we wear and penetrate to the innermost portions of our anatomy by means of the atmosphere which we shall very soon be cautioned not to breathe.

The Meanest Man Bill,

They were discussing the freak bills that get themselves introduced into congress every year when a Coloradc representative said:

"Sometimes I think the greatest boon we could have in this country would be the adoption of a federal statute in accordance with a bill an odd character in Colorado once want ed me to offer to the state legislature It was entitled the meanest man bill and provided for an election in every county each year to determine who was the meanest man in the county. The man receiving the highest vote was to be hanged. Think of the good such a statute would dol Just consider what decent citizens all the people would be who received a few scattering votes! And those who stoof any chance of leading the ticket would move away. In two or three year: every place where the law was i: operation would become a model com munity."-New York Press.

imaginable, and one for the largest, and many challenges. others for the sizes in between! Whatever type of range you need be sure we have just that kind of a Range. Service Providence and the NOTICE Look at our ranges carefully, and note their workmanlike construction, and straight, clean, symmetrical appearance; examine their oven doors, linings, pans and cocks. All these are important if the range is to give good service And if you listen to the story of the capabilities of a gas range, you'll understand why range-users say

"Yes, I Cook With Gas."

EFFICIENCY !

Hot Water All The Time !-

N these bright sunny days, although the thermometer stands persistently in the nineties, hot water is still required. There are little ones to bathe and household tasks to perorm and every day brings a renewed demand for hot water. How to get it?" that's the question.

The Gas Water Heater

inswers the purpose admirably. It's a practical apparatus asily and quickly installed. Connect one to your kitchen poller-no matter whether your boiler be attached to a coal ange-and the heater will work in conjunction with, or inependent of, your coal range, as you desire!

t's an accommodating apparatus and stands ready to serve our daily needs. In five minutes it will give sufficient hot ater for dish washir.g -- in fifteen minutes enough for a bath!

ote it's simple construction. A double coil [25-feet] of seamless copper tub-g, with a powerful gas burner beneath. The burner is removable and can cicaned as often as desired. as ville in the 1
