the contemplated patent roller flour- pl ce at Green H.II Cemeter; ing mill at this place. Dr. Benbow was called to the chair, and Mess. Michaux, of the Workman, Elam of

Remarks were made by various individuals, and the absence of several interested persons was remarked upon, attributing their absence to probable sickness in their own or their neighbors' families. Mr. Carbett, of statevenes ate as his 80th year. He quarter for his joys. Paul was two Washington, D. C., being present, as aft a numerous progeny, salong was drawn out in statements as to the cost of a roller mill of certain dimensions and capacity. He stated that the size of a building, for the greatest convenience, for the manufacture of 100 barrels of flour per day, would be 30x50 feet. 2 1-2 stories high-2 stories above basement, with garners resting on independent foundation. The power for such a mill would be 65 horse power engine, which would run likewise a corn mill. The cost of such a building with engine, and without other machinery would be about \$5000; the same fitted for work complette, about \$12,000. The difference between a mill with capacity for 50 barrels of report was contradicted on good authorflour per day and one of 100 per day, are. He is very lew and in a critical would approximate \$1,000 first cost. eor drion. It requires from 30 to 40 lbs. of soft coal to the barrel of flour made, and formen excepted trip of a business has the cost of making each barrel of bir to the conhessers and southern ficur ranges between 30 and 40 cents, ruetiets of the state. tais being the expense on all the outhay on running account. The amount leigh road this morning if wheat to make a barrel of flour is about 4 bushels and 30 to 35 lbs. Al- stopped over here last night and left so, 458 bushels and 20 lbs, or about, will make 100 barrels of flour: 700 lbs offal and goo lbs invisible loss. A manual tron. Morehend City best night. mill should make about 20 per cent. of patent flour, and 70 per cent. of baker's floor-the fraction of low Miss Marion Ruchardson, and Mr. grade. The calculation as to run- Rob. tialiaway, of Reidsville, who ning expense is based on \$4 per ton as the price of soft coal used. The cost of the machinery proper for the mill was estimated at \$4,326, and the here last night or route home, time in which the building could be ready for the machinery, two months. Mr. Carbett gave very satisfactory views as to the cost of such a mill as was wanted, and of all matters related thereto, and was listened to with very patient interest. Notwithstand-ing the untoward absence of several persons who had been expected to be Price 25 cents or loss present, there was an interest shown which will, we trust, eventuate in the successful operation of the much needed flouring mill, and the meeting adjourned to be called by the chairman when necessity should require.
