

## Hot Point and Rid-Jid Board

Away With the Old  
On With the New.

Never before was a saying more true or more sensible than when applied to ironing. The old way is tiring, health-breaking labor, while with an

Electric Iron it almost assumes the position of pleasure. Let us demonstrate the satisfaction of a Hot Point Electric Iron and a

### GIFT TO THOMAS A. EDISON.

Henry Ford has sent to his friend Thomas A. Edison, the first complete set of Johansson gages manufactured in the United States. The set consists of eighty-one blocks and these delicate little pieces of steel are accurate within four millionths of an inch. They are contained in a newly developed bakelite case.

For many years Johansson gages have been accepted as standard for measurements throughout the world, and until recently they were manufactured exclusively in Sweden, the native land of the inventor, Carl E. Johansson.

In order to take care of the United States needs the Johansson company acquired a plant at Poughkeepsie, N. Y., but before manufacture of blocks began the Ford Motor Company in 1923, purchased the plant together with the American manufacturing rights. Mr. Johansson joined the Ford organization as a member of the engineering staff to further develop his precision instruments.

And so it was in the new laboratories of the Ford Motor Company at Dearborn that he recently completed the set Mr. Ford has just presented Mr. Edison.

### YOUNG GIRL KILLED BY AUTO-MOBILE SUNDAY.

Haywood Journal.

Passing at a rapid rate through a crowd of people that lined both sides of the highway at Bethel last Sunday morning while a funeral service was in progress at the Methodist church, an automobile driven by George Howell, of Ravensford, struck a Miss Stamey, daughter of Mr. Ras Stamey, of near Canton, knocking her down and inflicting injuries from which she died shortly afterwards. Some of those who witnessed the unfortunate occurrence say that the car was going at the rate of about thirty miles an hour when the accident happened.

As stated, a funeral was in progress at the Methodist church near the high school building and the congregation was filing out of the church when the car driven by Geo. Howell came in sight. Automobiles were parked on both sides of the road in front of the church and Miss Stamey with her friends started over the road to their car when as she was passing out from behind one of the parked cars she was struck by the passing car and knocked violently to the ground with the result as stated.

The injured young woman was taken to the hospital in Waynesville, but died shortly after getting there. Geo. Howell was arrested, brought to Waynesville, and lodged in jail. Later the body of the young girl was carried to Canton for burial.

### THE CAROLINA PLAYMAKERS.

"Hunter Stagg, writing in the Richmond Times-Dispatch, pays tribute to the Playmakers as follows:

"Like the Italian Pagliacci, players who tour the country in a cart, the Carolina Playmakers have been traveling throughout the south, from Atlanta to Miami. But with a difference—the carry their scenery in a Ford and travel themselves in a big white passenger bus, equipped with a smoker and a compartment for hand luggage, and decorated with Playmaker masks and banners. The actors, all students of the University of North Carolina, have written, mounted and produced their plays under the direction of Prof. Frederick H. Koch, whose work may well be compared with Professor Baker's at Harvard. Many of the plays deal with the mountain folk, legendary themes, and the like, so that they offer a rich treasury of indigenous literature. The best of them have been collected and published by Henry Holt and company, in two separate volumes, the second having come out in the fall, and little theatres all over the country are producing these one-act dramas.

"Only the past week the Christian Science Monitor devoted the better part of a page in exploitation to the excellencies of this North Carolina organization, giving it rating among the highest standards in the theatrical world.

"It is high time Carolina added these youthful artists to the list of Tar Heel accomplishments in the world of affairs."

Perhaps we may well take a lesson from the Finns, who assert that the achievements of their great runner Nurni, in the United States is worth thousands in advertising to the homeland. Certainly, the Playmakers should be a source of pride to the people of North Carolina.—Wilmington Star.

### THE KEY.

The community's duty to education is its paramount moral duty. By law and punishment society can regulate and form itself in a haphazard and chance way. Through education society can formulate its own purposes, can organize its own means and resources, and can shape itself with definiteness and economy.

It is the business of every one interested in education to insist upon the school as the primary and most effective interest of social progress. The art of giving shape to human powers is the supreme art.—John Dewey.
