

That's Different.
 "When we want to say something that we don't dare say in English, we use French."
 "And when the French want to say something they don't dare say in French?"
 "Ah, you could make your fortune in Paris if you could only discover that something."

Careful Diagnosis.
 "Well, how did you succeed with your first diagnosis? Did you profit by my advice?"
 The Young Doctor—I think I did, sir. I told the patient that he was suffering from a combination of liver, stomach, heart, lung and brain trouble.
 Old Practitioner—Good! No chance of a mistake there.—Stray Stories.

The Kind You Have Always Bought.

THIS is the caution applied to the public announcement of Castoria that has been manufactured under the supervision of Chas. H. Fletcher for over 80 years—the genuine Castoria. We respectfully call the attention of fathers and mothers when purchasing Castoria to see that the wrapper bears his signature in black. When the wrapper is removed the same signature appears on both sides of the bottle in red. Parents who have used Castoria for their little ones in the past years need no warning against counterfeits and imitations, but our present duty is to call the attention of the younger generation to the great danger of introducing into their families spurious medicines. It is to be regretted that there are people who are now engaged in the nefarious business of putting up and selling all sorts of substitutes, or what should more properly be termed counterfeits, for medicinal preparations not only for adults, but worse yet, for children's medicines. It therefore devolves on the mother to scrutinize closely what she gives her child. Adults can do that for themselves, but the child has to rely on the mother's watchfulness. Genuine Castoria always bears the signature of *Chas. H. Fletcher*.

Enterprising White.
 A writer gives a little sketch of black and white in Natal. He tells how he came across a white boy, some fourteen years old, and a group of raw natives playing a game. They were shooting with an old muzzle-loading shotgun at a bottle on the top of a case. When the youngster smashed a bottle he received a "tickey" (a threepenny bit) from the natives. When a native hit it he received three-pence from the boy.
 "That seems a funny sort of game," remarked the witness to the boy.
 "Oh, the game's all right, sir," replied the lad. "You see, I load the gun."

Implement Generally Used.
 "Sir, we are starting a new railroad and want your daughter to drive the first spike."
 "I have no doubt she will consider it an honor to officiate."
 "Thank you. We have provided a small gold spike. Also a silver hammer."
 "One minute. I don't think she could drive a spike with a hammer. Better provide a hair brush."

NOTHING SO EFFECTIVE AS ELIXIR BABEK For Malaria, Chills & Fever.
 Chief of Police, J. W. Reynolds, Newport News, Va., says: It is a pleasure to recommend Babek for Chills and Fever. Have used it when necessary for 20 years and have found no remedy as effective. Elixir Babek 50 cents, all druggists, or by Parcel Post, prepaid, from Klossow & Co., Washington, D. C.
 A Good Move—Babek Liver Pills. 25 cents.

No Compromise.
 "Is Jiggers consistent in his vegetarianism?"
 "I should say he is. Why, he won't even eat cabbage because it is so intimately associated with corned beef."
 If you are able to appear indifferent the man who wants to sell you his dog finally will give him to you.

The General Says:—
Roofs don't wear out—they dry out. When properly made they dry out very slowly and give the best service.
Certain-teed Roofing
 Made with a soft center asphalt and coated with a harder blend of asphalt, which keeps the soft saturation within—the life of the roofing—from drying out quickly. Guaranteed 5, 10 or 15 years according to thickness—guarantee backed by the largest Roofing and Building Paper Mills in the World.
 Sold in your town at reasonable prices by your own dealer whom you know.

DUAL-PURPOSE CATTLE GROWING IN FAVOR

Prize-Winning Aberdeen-Angus Cattle.

The Aberdeen-Angus originated in Scotland and was first brought to the United States in 1873. They are raised extensively in Iowa and Illinois and many other of the central states, and are rapidly growing in popularity in every section. Large numbers of this breed are being raised in Argentina. By some breeders they are not considered to be as well adapted to range conditions as some other of the beef breeds, however. They are but slightly smaller than Shorthorns and they mature almost as early (at about thirty months).

They are good feeders and the quality of the meat is superior to that of the larger breeds. It is generally believed that so-called beef breeds are better for beef production than dairy breeds or scrubs. A comparison of breeds at several experimental stations showed no constant differences in meat production among beef breeds. The comparison in "is-souri" gave the Aberdeen-Angus first place in palatability of meat their extreme uniformity in color and all around excellence.

MIXTURE FOR PASTURE

Variety of Seeds for Securing Hay Crop of Good Quality.

Plan Outlined for Permanent Sod That, If Properly Cared For, Will Improve With Age—Mulch Affords Protection.

Instead of seeding timothy alone, the following mixture is suggested, per acre: Timothy, ten pounds; red clover, eight pounds; alsike, two pounds; orchard grass, four pounds; Italian rye grass, five pounds; English rye, four pounds; meadow fescue, four pounds. Such a mixture will give a heavier hay crop and hay of better quality than timothy alone, and when left as pasture will afford a much greater quantity of forage throughout the growing season besides being earlier. Kentucky bluegrass will usually come into the pasture of its own accord but can be hastened by seeding about five pounds with the mixture mentioned above. If the grasses mentioned above are not available, then a mixture of twelve pounds of timothy, eight pounds of common red clover, four pounds of mammoth clover and four pounds of alsike may be seeded. The grasses should be seeded in the fall with the winter grain and the clovers in the early spring when the first goes out, or both may be seeded together with the spring grain. If a grass-seed attachment to the grain drill is not available, the seed may be mixed in the proper proportions with the grain in the grain box and allowed to run down the grain tube with the grain.

The timothy and clover will be available for hay the first year after the grain is cut. By the third year a good permanent sod will be secured that, if properly cared for, will improve with age. Such pastures will not produce much feed during periods of intensive drought, but if they have been properly cared for will begin to grow again as soon as rains come. To avoid as much as possible the injury from drought it is essential that pastures be not grazed too closely. There should be a good green cover or "grass mulch" in order to protect the roots from the hot sun. Such a pasture will remain green longer during dry weather and will begin to grow as soon as the drought is broken, thus shortening the period of bare pastures.

What He Used Them For.
 Customer—I want another fire extinguisher. Used the last one all up last night.
 Clerk—Glad to sell them to you, sir, but aren't you rather careless at your place. That is the third one I've sold you in a week.
 Customer—Oh, I don't use them for fire. They are the greatest thing on earth for chasing out your daughter's late callers.—Judge.

GOOD SEED CORN IS DEFINED

Should Be Well Adapted to Seasonal and Soil Conditions—Make Selection From Stalks.

Many consider seed corn good simply because it will grow. To be first class it must be—
 Well adapted to your seasonal and soil conditions.
 Grown on productive plants of a producing variety.
 Well matured and be preserved from ripening time to planting time in a way to retain its full vigor.

Varieties that produce most in some states are the poorest in others. Seed ears taken from high-yielding rows have repeatedly produced more corn than ears taken from poor-yielding rows.

Well-preserved seed corn will give a 12 per cent higher yield than poorly kept seed, on poor soil, and 27 per cent higher on fertile soil.

Much the best way to select seed corn is from stalks standing where they grow, as soon as ripe and before the first freeze.

Poultis Dislike Handling.
 Poultis will not bear handling at all. Like chickens, they must be where they can have liberty as much as possible, in a position to get down off roost early and out long before you are up and out.

KEEP THE COW COMFORTABLE

Not Advisable in South to Go to Expense of Building Elaborate Structures for Stock.

(By H. M. COTTRELL.)
 The cow should have shelter and care that will insure her being comfortable 24 hours every day. This will vary with the climate. In summer cows need a shade with free movements of air. This may be supplied by a grove in which the underbrush has been cleared out, or a shed with a roof but no sides.

I would not go to the expense in the South and Southwest of building a barn with fixed stalls, cement floors and gutters. I would dehorn my cows and shelter them in a closed-in roomy shed. I would arrange one side so the cows could be tied up while being milked and while eating their silage and grain. The hay would be fed in racks and the cows would run loose except at milking time. Others prefer the regular sanitary stable. Whatever method is used, the surroundings should be arranged to give comfort, an abundance of light and pure air and economical handling of the feed, the cows, their milk and the manure.

In handling cows watch their droppings and feed so that the droppings will be like they are when the cows are on good pasture. The profits in many herds are lost because the cows are fed combinations of feeds that make them constipated. Feed the cow laxative feeds for two months before her calf is due. Twenty-four hours before the calf is expected if she is constipated at all, give her one and one-quarter pounds of Epsom salts dissolved in water. Give this as a drench.

NOTES ON MILK SANITATION

Covered Pail Keeps Out Dirt—Let Sunlight Into Barn—Whitewash Is Effective Disinfectant.

See to it that your bottled milk does not show a sediment; if so give the hooded or covered pail a trial, together with the usual straining—it will bring results.

Clean up your barns and cows and keep them clean. Cut some windows in the milking barn and let all the sunlight in that you possibly can.

Do not advertise the fact that you are lax with the disposal of the manure by letting the pile accumulate near the barn.

Wash your hands and put on clean clothes before milking and see that your help does likewise. You will take more pleasure in drinking the milk when you sit down to your own table.

Do not tolerate the practice of milking with moist hands; it is a very unclean practice at best.

Brush down the cowbells and put a coating of whitewash all over your cow stable once and see how much better it looks to you; then get the habit of doing the same thing often.

Whitewashing is a cheap and effective way to secure a change for the better. It not only brightens up the place, but acts as a disinfectant as well.—Office of Dairy Experimentation, West Raleigh, N. C.

GOOD DEMAND FOR PUMPKINS

Always Market in Cities for Nice Specimens of Pie Material—Medium Sizes Preferred.

There is always a market in the cities, at fairly good prices for nice specimens of pumpkins and squashes that will make good pie material. Grocers handle a few, and others can be retailed readily. For this trade, medium-sized specimens of good quality are preferred over the large overgrown ones.

The old reliable Hubbard is a good variety of squash to grow for market purposes, and one of the small pie pumpkins that possesses a good quality is better than the large varieties which are usually grown for stock food.

TURKEY'S RULER A SICK MAN

Sultan Must Feel Burdens of His High Office Press Heavily Upon His Shoulders.

The sultan of Turkey, Mohammed V, the head of Islam and the thirty-sixth ruler of the house of Osman, is sick. Once such a report would bring visions of royal relatives mysteriously poisoned, bowstrung or dropped, bound and sacked, into the dark waters of the Bosphorus, and of fortune tellers, wizards and exorcisers crowding around the ailing sovereign's bedside. Now the people talk of prospective heirs and of regents, while the sultan's Christian ally commends him to Allah and sends his ablest physician.

When the young Turks lifted Raschid Effendi upon the throne from which they had shoved his brother, Abdul Hamid, they dragged a man of sixty-five from a palace where he had been all his life scarcely more than a prisoner. In years of inactivity his body had grown big, big in width, breadth and length, a burden for his short legs. He was a sick man then. On the Selaflık Fridays the chalky paleness of his heavy face and the dullness of his eyes were accentuated by the troops of young guardsmen in brilliant uniforms and the officers in glittering gold braid who surrounded him. The picture had in it more of pathos than imperialism.

When he went to appeal to the loyalty of the Albanians on the field of Kasso, Macedonia, he was the first Ottoman sovereign to visit his provinces on a mission of peace. But the Albanians, who had imagined the sultan had wings and few of humanity's frailties, were disappointed at the sight of the heavy, feeble man in a black frock coat, and the mission failed. He seemed to lack either the knowledge or the physical force to combat the shrewd politicians around him, and he became merely a figurehead for the dominant party of the committee of union and progress.

Many things may happen with the passing of this sick man. He may be the last of the Osmanli to rule in Europe; he may be the last to bear the honors and title of the caliphate. But he has been a part of the almost forgotten hope to restore the glories of the empire, and has lived to see a Turkish army with munitions of war and supplies making a desperate and so far successful attempt to hold the almost sacred Dardanelles against a great enemy.—New York Sun.

Speaking From Experience.
 "Pa, what is the first line of defense?"

"That depends on the circumstances, son. If this country were at war, the first line of defense would be the navy. When a man's married, it's usually the telephone line, by which he tries to square himself before he comes home."

Good Reason.
 First Motorist—This is terrible heat.
 Second Motorist—But you must remember we have been scorching.

Sick Women Attention

Is it possible there is a woman in this country who continues to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, which proves beyond contradiction that this grand old medicine has relieved more suffering among women than any other one medicine in the world?

We have published in the newspapers of the United States more genuine testimonial letters than have ever been published in the interest of any other medicine for women—and every year we publish many new testimonials, all genuine and true. Here are three never before published:

From Mrs. S. T. Richmond, Providence, R. I.
 PROVIDENCE, R. I.—"For the benefit of women who suffer as I have done I wish to state what Lydia E. Pinkham's Vegetable Compound has done for me. I did some heavy lifting and the doctor said it caused a displacement. I have always been weak and I overworked after my baby was born and inflammation set in, then nervous prostration, from which I did not recover until I had taken Lydia E. Pinkham's Vegetable Compound. The Compound is my best friend and when I hear of a woman with troubles like mine I try to induce her to take your medicine."—Mrs. S. T. RICHMOND, 84 Progress Avenue, Providence, R. I.

From Mrs. Maria Irwin, Peru, N. Y.
 PERU, N. Y.—"Before I took Lydia E. Pinkham's Vegetable Compound I was very irregular and had much pain. I had lost time with children, and felt worn out all the time. This splendid medicine helped me as nothing else had done, and I am thankful every day that I took it."—Mrs. MARIA IRWIN, R.F.D. 1, Peru, N. Y.

From Mrs. Jane D. Duncan, W. Quincy, Mass.
 SOUTH QUINCY, MASS.—"The doctor said that I had organic trouble and he doctored me for a long time and I did not get any relief. I saw Lydia E. Pinkham's Vegetable Compound advertised and I tried it and found relief before I had finished the first bottle. I continued taking it all through middle life and am now a strong, healthy woman and earn my own living."—Mrs. JANE D. DUNCAN, Forest Avenue, West Quincy, Mass.

Write to LYDIA E. PINKHAM MEDICINE CO. (CONFIDENTIAL) LYNN, MASS., for advice. Your letter will be opened, read and answered by a woman and held in strict confidence.

Keep Your
 Just as you are young at heart as old as the hills.
 Many people suffer from aching limbs, backache, rheumatism, and other troubles, when a little help from Doan's Kidney Pills will do the trick. It will get rid of the trouble, and keep you young and healthy.

DOAN'S KIDNEY PILLS
 50¢ at all Stores
 Foster-McMillan Co. Prop. Buffalo, N. Y.

One on Rufus Choate.
 Judge Parry, in a recent article, "Rufus Choate, Advocate," says: "Rufus Choate would meet with Sam Weller. Defending a prisoner for theft of money from a ship's possession was called who had turned evidence and whose testimony was proved that Choate's client had gated the theft."
 "Well," asked Choate, "what say? Tell us how and what he got to you."
 "Why," said the witness, "he there was a man in Boston named Choate and he'd get us up to the boots."

Hanford's Balsam is good for the poisoning. Adv.

Labor is the foundation of man's big fortune—but not necessarily of laborer's.

How to Treat Croup Externally

Rub Vick's "Vap-O-Rub" Salve over the throat and chest for a few minutes—then cover with a warm flannel. Leave the covering loose around the neck so that the soothing medicated vapors may loosen the choking phlegm and ease the difficult breathing. One application at bedtime insures against a night attack. 25c, 50c, or \$1.00. All druggists.
