CP&L servicemen and line crews are regularly on the job to make sure you enjoy dependable, efficient electric service. They routinely install new power poles and transformers, connect electricity for new customers, locate and correct potential trouble spots, see to repairs and maintenance work.

These CP&L men also are alert to handle emergency situations when and where they occur. A sudden storm, a fallen wire, a damaged power pole—anything that interrupts your fulltime electric service is a signal for CP&L men to act immediately, no matter what time of day or night.

A lot of CP&L men are at work throughout the Carolinas today. If anything goes wrong tonight, they'll be working then, too.
