Why do more and more Growers

TURN TO GASTOBAC

to get better cured tobacco?

from actual written reports, Gastobac users say,

"IT'S THE QUALITY THAT COUNTS"

MORE EVEN HEAT DISTRIBUTION

Gastobac's scientifically designed pattern of many equally spaced burners gives you more uniform heat distribution, in all parts of your barn, than most other systems. Gastobac's heat pattern warms every corner — every leaf. Whole leaf cures better — texture and color has same high quality.

LOW TEMPERATURE, FLOWING AIR CURE

Warm, dry air method greatly reduces danger of "baked out" tobacco (because Gastobac can be operated at lower temperature, fuel costs are reduced) — natural gums and oils remain in the leaf, producing a heavier-bodied tobacco that brings highest price at market.

EASE OF OPERATION... SET IT! FORGET IT!

Thermostatic controls maintain the temperature you desire... no need to "overheat" or "underheat." Even in cool, rainy weather, heat responds rapidly — is easily controlled at desired setting. (Low cost, long-lived Gastobac systems cure faster, too, holding fuel consumption to a minimum.)

GAS HEAT'S CLEAN

Leaves no gummy film or soot — cures cleaner, with rich golden color. (Saves on maintenance, too — no flues to clean — no clogged burners to break down.)

TO SUM IT UP, THE GROWERS SAY... "HIGHER PROFIT MAKES THE DIFFERENCE IN USING GASTOBAC!"
