Hunting Safety Instructor

Recently the U.S. Wildlife Resources Commission announced the rule of administering a Hunter Safety program in N.C. States now require this course before a hunting license is issued, but as of now this is not a requirement in this State.

For many years the Commission has been presenting Hunter Safety programs on a limited basis, but as of Jan. 1975 a special group of officers were assigned to administer this program by utilizing Wildlife Commission personnel and qualified volunteers that could teach Hunter Safety to young people and adults.

Although the course is not mandatory in this State, it is being offered by the Commission and the graduation certificates that are issued are honored in all 16 states where this program is mandatory.

In trying to place qualified instructors in every area of the State so that everyone will have the benefit of receiving

the worthwhile course of instruction, the Wildlife Resources Commission announced the appointment of a John Luther Powell, Jr., P.O. Box 58, Warsaw, N.C. 27998 as qualified Hunter Safety instructor after having completed an instructors' training school and demonstrating the qualifications necessary to instruct others in the art of Hunter and Firearms Safety.

Mr. Powell will be assisting Hunter Safety instructors Bill Faust and Wildlife Protector John Smart with their instruction of firearms and hunter safety training they are teaching the boy scouts in this area. All 8 men will be available to assist in the planning or presentation of Hunter Safety programs.

In ACTION

Harold Rose-President

There are two trends being noted in counteracting the problem of illegal drugs in N.C. These trends are a very definite movement toward the misuse of hard drugs, such as heroin, and a movement of some drugs to a younger age group.

There seems to be more heroin available throughout N.C. It has spread from our larger cities to our even most rural areas. While the age of pushers and suppliers arrested seem to be climbing, information is that many people are starting to use drugs at a younger age. The indications are that many young people start on legal drugs that can be misused and move into marijuana and acid.

The battle of the drug problem in N.C., has proven that law enforcement cannot stop the flow of drugs alone. It is obvious that it is a social problem and that in order to effectively combat it, a much greater effort is going to have to be made by community leaders. While laypeople could be helpful in drug education programs, it would be more important to develop and expand youth opportunity programs which

all drugs, and those which throughout the year. It is fair that a young person who has accumulated a record in one or two states is more likely to be caught at some of the states involved.

SOFTEN YOUR TAXES

A new epidemic is sweeping the country. Identified as Taxes it is spread by the "bite" of Uncle Sam's ferocious IRS men and hits the pocketbook like an experienced thief!

Softening the tax bite this year are numerous deductions, not the least of which concern medical allowances. Cost of drugs exceeding 1% of income may be deducted, along with 1/2 of health insurance premiums up to \$150, and all medical expenses exceeding 3% of income. In addition health insurance in excess of the 1/2 deduction already allowed may be included as medical expenses subject to the 3% rule.

Little known deductibles include cost of transportation to get medical treatments, money paid to maintain a dependent in a therapeutic center for drug addicts, and acupuncture treatments.
