

Warsaw Hikes Sewer Rates

Local residents will pay more for sewer service beginning in July.

The minimum utilities rate has been \$7 per month for up to 4,000 gallons of water, plus 50 percent of the water rate (\$3.50) for sewer and \$3 for garbage pickup—a total of \$13.50 per month.

Starting next month, the sewer rate will be increased to 90 percent of the water

charge. The minimum will still be \$7 for water, but the minimum sewer rate will rise to \$6.30. The garbage collection fee will remain at \$3. The new minimum total will be \$16.30 per month.

The Town Board Monday night approved a rezoning request for a rest home to be located across the street from Warsaw Elementary School a 60-bed rest home is planned for the site.

A shower of needles was the result of a cyclone striking a factory that made knitting needles.

Attention Duplin Quilters

The Duplin County Arts Council is working on plans for the County Fair in October. A display of Duplin County quilts or quilted objects is being planned. This would be an educational

exhibit (no sales or competition) with antique and newly made quilts on display. Special security will be given the display. Quilters are also invited to work in the exhibi-

tion room on objects during the exhibition hours. Please call the DCAC office right away to register your interest or to let us know of individuals whom we might contact.

BASEBALL FIELD READY FOR '84 SEASON. The athletic complex at James Kenan High School will include a new baseball field and football/track stadium. Head football and track coach at James Kenan, Billy Byrd is pictured above at the new complex with the baseball field in the

background. According to Byrd \$100,000 is needed to complete the project to the stage where all fields will be usable. While the new baseball field will be used during the coming season, Byrd said, the football and track stadium will not be in use until the 1984-85 school year.

Funds Needed To Complete Athletic Complex At JK

A new athletic complex is under construction at James Kenan High School and head football and track coach Billy Byrd said \$100,000 will be needed to complete the project.

"The complex is the kind of thing which can be completed with just the bare necessities or as nice as money can buy," James Kenan High School Coach Billy Byrd said. "But, to complete the plan where all fields are usable—just the bare necessities—\$100,000 will be needed." According to Byrd the complex will enable the school to locate all its sports activities at the high school, in past years girls softball and track meets have been held away from the high school. James Kenan softball practice and home games are played at the Kenansville Municipal Park or the Warsaw Recreation Park. Track meets are held away from James Kenan, however, Byrd added, the high school has won the conference meets four of the past seven years.

The completed project will include a new football field and paved track and a new baseball field. The existing baseball field will be converted into the softball field and the existing football field into a practice area for football and band, Byrd said. The new baseball backstop fence has been installed and the field seeded, Byrd said. The new diamond will be used next season. A fence to divide the front of the athletic complex from the parking area being installed parking is currently being installed at the high school. Use of the new football field and track area is not expected before the 1984 season, Byrd added.

"To complete the project it will take about \$100,000," Coach Byrd said. "And, that is needed to light the football field and track area, pave the track and furnish new bleachers for the homestead. The top priorities of the project are a fence separating the fields and parking on the back side of the athletic complex and outdoor restroom facilities. The James Kenan Athletic Boosters Club are working toward the outdoor restroom facilities as their next project. No funds have been approved in the Duplin County Board of Education budget to assist with the completion of the athletic complex at James Kenan, Byrd explained. The high school athletic department and the Athletic Booster's Club are expected to raise most of the funds needed to complete the project.

"When the project is complete I am looking for an increase in sports participation," Byrd said. "I think the entire sports program may double, and the facility will help improve student performance, especially in track. Most of all we want the facility to be something the community and school can take pride in." The project is expected to take about five years to complete.

However, Byrd pointed out, the high school athletic department has a limited amount of funds to be used completing the complex. The high school athletic department is self-supporting providing new equipment and repairing old equipment and paying game officials and utilities from revenue received at the gates and from season tickets and football program ad sales. Football is the athletic program's largest money making sport.

Byrd said, while basketball will generate enough revenue to pay expenses. Baseball, softball, tennis and track create no revenue, but cost the athletic program money for equipment, officials and transportation. An average year, Byrd estimated \$11,000 to \$12,000 would be raised from football at James Kenan. The same year, he said, operating cost for the athletic program would be about \$10,000.
