**Announcing Our New Buck-Building System.**

**Now, instead of buying certificates with rates, terms and amounts set by Federal regulations, you can pick the amounts and terms that work for you. So, in effect, from now on you'll be making your own rules, not the regulators.**

**7-31 days**      **2-3 mos.**      **4-11 mos.**      **12-23 mos.**      **24-35 mos.**      **over 36 mos.**

For years, Federal regulations determined the way we did business with savings customers. As a result, on most certificates, \$1,000 deposits would earn the same rate as \$10,000 deposits. Often, short-term plans were permitted higher rates than longer term investments. Finally, the regulators, not the savers, fixed the timeframes for deposits. None of this made much sense to us. But it's all over now. After October 1, the Depository Institutions Deregulation Committee (DIDC) has said that we can set certificates up any way we like. And we're making it very simple:

1. The more money you invest, the higher your rate.
2. The longer you leave your money with us, the higher your rate.
3. You pick the maturity, from 7 days to 36 months or longer, or any time in between.

We compound interest daily, so you earn the maximum yield. What's more, if you have some emergency and need your money early, we've reduced the penalty to the minimum the law allows. The chart shows you the basic idea. Now, the specific rates will change from time to time, but the idea won't change: your bucks can now build up a lot faster with us. So, whether you have money to invest or a CD maturing with us or someplace else, ask for the details, along with our current rates. Now you don't have to leave the neighborhood for the latest way to put more muscle in your money.

One thing that hasn't changed: With \$10,000 in a certificate, you get all the advantages of Deluxe Banking.

On maturities of 31 days or less, you have to invest \$2,500 or more, but on maturities over 32 days, you can start with as little as \$1,000. In short, the system is flexible enough to pay you a good rate on your money for the time that works best for you.
