Survey of Average Price Per Kilowatt Hour For Residential Customers in 28 Cities For 12 Months Ending June 30, 1983.

Like the cost of just about everything else, the price you're paying for electricity has gone up for the past few years.

But it could've been worse. In fact, as you can see by the chart, CP&L ranked less than a penny over the lowest price per kilowatt hour.

What's more, in 3 out of 4 towns, you'd pay more.

And, with your help, we'll keep on conserving energy and looking for more efficient ways to operate so we can stay close to the bottom of the list.

That way, both of us will get more out of our energy dollars.
