GOOD RECORD.

Railroads in the Southern Region are keeping up their excellent showing made on-time passenger train service. Records for June, made public today by the United States Railroad Administration, disclose that 94.4 per cent of nearly 51,000 trains operated during the month maintained schedule or made up time. This not equal the new record set in May, but it surpassed any other performance.

The figures are all of the 28 Southern roads under Government control. These roads operated exactly 50,949 passenger trains in June, and 48,140 of them maintained schedule or made up time where delays had been caused by connecting lines. Trains arriving on time at terminals in spite of delays for any cause numbered 46,885, or 92 per cent of the total.

As usual, the performance of the 17 larger roads was slightly better than that of 11 in the smaller group. Of the 46,063 trains operated by the larger lines, 94.5 per cent maintained schedule or made time, and 93.7 and per cent, respectively, for the 4,886 trains of the smaller group.

Heading the larger roads in the on-time at final terminal column was the Illinois Central, with 96.6 per cent for 6,380 trains. The Georgia was a close second with 96.3 per cent for 568 trains. The Southern Railroad operating 15,016 trains, or about one-third of the total for the larger roads, had a record of 95.6 per cent maintained schedule or made up time, and 92.6 per cent on time at final terminals.

Customs Hard to Down.

Pens made of feathers were common in the seventh century, but so inveterate was the old habit of writing with reeds on parchment and paper that it continued a long time after the first use of quills. The custom of carrying a pen behind the ear is ancient, as may be seen in the life of St. Odo: "He saw a pen sticking in his ear in the manner of a writer."

Verdure on China's Great Wall.

Trees and shrubbery planted in the soil that has been accumulating for hundreds of years on the great wall of China are in thriving condition, some of them having grown to a height of 12 to 18 feet. This method of beautifying the great wall was an outgrowth of the movement for the reforestation of the country started some time ago with government sanction under the direction of foreign experts. The driveway on the great wall is considered very much improved with the addition of trees.

CERTIFICATE OF DISSOLUTION.

STATE OF NORTH CAROLINA,
Department of State.

To All to Whom These Presents May Come—Greeting:
Whereas, it appears to my satisfaction, by duly authenticated record of the proceedings for the voluntary dissolution thereof by the unanimous consent of all the stockholders, deposited in my office, that the Tryon Paper Box Company, a corporation of this State, whose principal office is situated in the town of Tryon, County of Polk, State of North Carolina (C. W. Ballenger being the agent therein and in charge thereof, upon whom process may be served), has complied with the requirements of Chapter 21, Revisal of 1905, entitled "Corporations," preliminary to the issuing of this Certificate of Dissolution.

Now, Therefore, I, J. Bryan Grimes, Secretary of State of the State of North Carolina, do hereby certify that the said corporation did, on the 10th day of June, 1919, file in my office a duly executed and attested consent in writing to the dissolution of said corporation, executed by all the stockholders thereof, which said consent and the record of the proceedings aforesaid are on file in my said office as provided by law.

Whereof, I have hereinafter affixed my official seal, this 10th day of June, 1919.
J. BRYAN GRIMES,
Secretary of State.

BUILD WITH IDEA OF BEAUTY

House Should Never Be Planned Solely Along Lines of Economy and Practical Utility.

An earnest plea for more beauty in building is submitted by a writer in the magazine Touchstone, who says in part:

"Building a home should be approached with reverence as well as joyous enthusiasm. There is no adventure in life more fraught with romance than the creating of a home. We are apt to turn to the past for precedent in architectural styles, whereas we should concern ourselves chiefly with the honest expression of our needs and surroundings.

"Love of beauty was almost a religion with the Greeks. To build an ugly thing was a misdemeanor, punishable with ostracism. Our country would be a much more delightful and much more agreeable place to live in if our home builders were guided by wise architects who took as much thought for beauty as they do for economy and profit. Every home is an investment, and a beautiful home returns far more interest on the money expended than does an ugly one.

"Would it not be well for us, now that we are facing an era of home building such as the world has seldom known, to pause a little and approach our task with greater carefulness? We should remember that we are building for the future as well as for present delight and that our descendants may turn to our work with respect, as we look into the past and bow before the genius of the ancient master builders."

TRELLIS EASY TO CONSTRUCT

Twisted Wires Support Sweet-Pea Plants in a Most Satisfactory Manner.

A very satisfactory sweet-pea trellis can be made by stretching wires on a frame of two-inch hard wood or one-inch pipe, the length of the frame being the same as the length of the

rows. The wires should be placed loosely about the frame, as shown, then tightened by twisting them with a spike. A trellis of this kind can be used for several years, and if desired can be removed at the end of each season.—Popular Mechanics Magazine.

Red Raspberries on Town Lot.

Just a small patch of a good variety of red raspberry will afford fresh fruit for the table for many weeks. Some of the new varieties are ever-bearing. Perhaps one of the best is the Erskine Park.

In setting out the plants first manure and spade the bed as for a garden. If the plants are trained to a wire trellis they can be set two feet apart. Six or eight plants will be sufficient for an average family and ought to produce at least a pint a day from each plant.

By having so few plants, they can be watered and well cared for. Hand weeding about the plant is always the best way to cultivate raspberries.—Thrifty Magazine.

Do You Think It Paid?

St. Joseph, Mo., employed a full-time expert garden instructor last year who organized the pupils of the elementary school into garden clubs. About 3,000 pupils reported that they were doing garden work before the schools closed in June, says their superintendent. Of this number 2,394 entered their names for membership in the United States school garden army. The school children gardened 32 acres without help and helped their parents work an area of 394 acres. Although the season was very unfavorable, a conservative estimate of the food produced by the pupils would be \$15,000 at market prices.

Yes, it's toasted

YOU know how much toasting improves bread. Makes it taste good. Of course—more flavor.

Same with tobacco—especially Kentucky Burley.

About Bathing.
Frequent bathing is conducive to good health as well as comfort. It keeps the pores of the skin clear, so that they can perform their proper function of clearing the system, through the skin, of excretions which are not discharged through the mouth, nose, kidneys or alimentary canal. Rinse with cold water. A brisk rub after the bath promotes circulation of blood.

Movie Statistics.
In one evening we now see 16 announcements of forthcoming attractions, 48 close-ups of the leading lady, 22 close-ups of the leading man, 12 close-ups of a wonder child, 620 people get into automobiles, 620 people get out of automobiles, six eternal triangles, 11 mistreated wives, nine unappreciated husbands, eight poor girls married to lords, three murderers, one hanging, 62 pies.—Film Fun.

Crow Has Earned Farmer's
Most commonly the crow is the young farmer because it picks up the young corn to get the six-corn nibs at the root, and every farmer has seen the scarecrow in the planted corn fields. Later on the age they do to the corn crop, they be estimated, because they water to enter the shops and corn.
