Undeveloped Country.

Lake St. John, at the head of the picturesque Saguenay river, has been brought to the notice of the Royal Society of Arts by Prof. J. C. McLennan as one of the best undeveloped power sources in North America. It has an area of about 350 square miles, drains a basin of 30,000 square miles, and is 315 feet above sea level. Three easily developed power sites are capable of yielding a total of 1,000,000 horse power at tidevater, and many sites for docks and industrial plants are available on the river.

Mr. P. LaDuke, Farmer, Says, "You Bet Rats can Bite Through Metal."

"I had feed bins lined with zinc last year, rats got through pretty soon. Was out \$18. A \$1 pkg. of RAT-SNAP killed so many rats, that I've never been without it since. Our collie dog never touched RAT-SNAP. You try it. Three sizes, 25c, 50c, \$1.00. Sold and guaranteed by The Ballenger Co. and The Carolina Hardware Co.

Arctic Night.

Viewed solely as a matter of optics, the Arctic night is as dark as any night. Explorers in high latitudes say, however, that there are many alleviations of the obscurity. The stars flash keenly, the moon comes along in a regular succession of phases, the snow surface relieves the gloom under conditions of the utmost absence of light, and the aurora borealis is the finest kind of illuminant. Explorers all agree that their men pass the winter night without much difficulty if only there are means of amusement.

Furs and Feathers.

From the dawn of human history furs and feathers have been used to satisfy our taste and need for clothing and adornment. Our most primitive ancestors were connoisseurs in the plumage of birds and the pelts of animals and admired them for their possibilities in furnishing himself and his family with raiment and adornment, and so do we.

A Lady in Chicago Telegraphs for Rat-Snap.

Read Mrs. Phillips' wire: "Youell's Exterminator Co., Westfield, N. J. Rush \$3 worth of RAT-SNAP." Later rec'd following letter. "RAT SNAP arrived. It rid our house of rats in no time. Just moved here from Pa., where I used RAT-SNAP with great results." Three sizes, 25c, 50c, \$1.00. Sold and guaranteed by The Ballenger Co. and The Carolina Hardware Co.

Analogous.

Spending a dollar before it is earned is like eating today the egg that is to be laid tomorrow.

Heat Bursts Gravel.

The bureau of standards has found that if the concrete is made with gravel, particularly siliceous gravel, there is a tendency for the stones to burst in extreme heat, which disintegrates the concrete. Accordingly it is recommended that gravel be avoided wherever possible, but if impossible the gravel concrete may be protected from extreme heat by coating it with an inch of cement, held in place by a wire mesh. Plasters may also be used in which asbestos is the principal constituent.

Beginning of Great Industry.

Plymouth was the first permanent white settlement in New England and dates its founding from the landing of the Pilgrims, December 21, 1620. The iron works on the banks of the Saugus river, established in 1643, were the first iron works in America. A small iron pet cast there in the first forge in America is now the property of the city of Lynn and is in a glass case in the Lynn public library.

He Knew Papa.

Bernice was just recovering from an attack of the flu and the first day she was able to sit up she said: "Mamma, I'm going to ask daddy to buy a tricycle." Her brother, who was playing in the room, spoke up: "Well, you'd better strike him for it right away, for if you wait till you gets well you mightn't get it."

A Rat That Didn't Smell After Being Dead For 3 Months.

"I swear it was dead at least 3 months," said James Sykes, Butcher, Westfield, N. J. "We saw this rat every day. Put a cake of RAT-SNAP behind a barrel. Months later my wife asked about the rat. Remembered the barrel, looked behind it. There was the rat—dead, not the slightest odor." Three sizes, 25c, 50c, \$1.00. Sold and guaranteed by The Ballenger Co. and The Carolina Hardware Co.

Dolls Long Popular.

There is ample evidence that the use of dolls as an assistance to the operations of the young mind dates from the most remote times. Among the native tribes of Africa it was the custom of married women to carry a doll with them until they had a child, when the doll was discarded.

Can Absorb Much Poison.

Dogs and horses can take 10 times as much morphine in comparison to their body weight as man can. The pigeon can take 500 times as much, while a frog is unhurt by a dose a thousand times greater, weight for weight, than one which will kill a human being.

Don't Worry

We can live a little while without sugar and while we are waiting let's eat more good ham and eggs and brains. This is Ham Week and it will pay to get one or two.

Armours Star, any size per lb.....	.38
Rex Cooked Brains per can25
