

## Why hens go on a strike!

The feed elements that make whites of eggs are entirely different from those that make yolks. When hens aren't fed both the white and yolk making elements, they can't lay.

Missouri Experiment Station tests prove that 100 lbs. of wheat, corn, oats, barley and kaffir corn make (above bodily maintenance) an average of 224 yolks to 154 whites. Based on data from the same experiments, Purina formulas produce, (above bodily maintenance), as follows:

Purina Scratch Feed	247.49 yolks	142.11 whites
Purina Chicken Chowder	182.05 yolks	282.55 whites
Combined Ration	429.54 yolks	424.66 whites

These Purina feeds not only make a practically equal number of whites and yolks but more of both than ordinary feeds.

Note that Purina Chicken Chowder contains the necessary white-forming elements to balance up the yolk-making grain ration. That's why it makes hens lay so heavily. Instead of the yolks being absorbed by the hen's system, Purina Chicken Chowder makes the whites to complete the eggs and they are laid. Thus we can absolutely guarantee

more eggs or money back

on Purina Chicken Chowder if fed with Purina Scratch Feed as directed. You take no risk.

# LIVE STOCK

## LESS HOG LOSS BY CHOLERA

Lowest Number of Animals Lost in History of Live Stock Industry of Country.

(Prepared by the United States Department of Agriculture.)

According to records of the United States department of agriculture for the 13 months from April 1, 1918, to April 30, 1919, hog cholera killed 2,815,004 hogs, valued at \$62,042,688.16, in the United States. This is the lowest loss by numbers for a similar period in the live stock history of the United States, but on account of the high price of hogs the monetary loss was heavy. For example, during the year ending March 31, 1918, hogs numbering 6,064,470 and worth \$58,833,653 died from cholera, while the next year the disease took 6,304,320 hogs worth \$67,697,461.

Department experiments show that timeliness in vaccinating hogs against cholera is all-important. When ex-

Cholera Control Means an Increased Pork Production.

posed hogs were vaccinated, while still apparently healthy, losses amounted to only 4 per cent, but when vaccination was deferred until the animals showed external signs of sickness losses averaged nearly 29 per cent. This shows that the man who puts off the preventive treatment until his hogs are sick with cholera stands only about one chance in seven of preventing fatal results. It is important, also, to maintain hog yards and barns in clean and sanitary condition.

### MEAT PRODUCTION IS BEHIND

Consumption is increasing, However, Points Out Animal Husbandry Head of Kansas.

Meat production has not kept pace with the growth in population in the United States, according to Dr. C. W. McCampbell, head of the animal husbandry department, Kansas State Agricultural college.

"In 1900 there were 680 head of cattle in the country for every 1,000 persons," he said. "This has now been reduced to 350 head."

"The figures for hogs and sheep show a similar reduction. In nine years hogs have dropped from 800 to 600 head for each thousand persons, and sheep from 880 to 450 head."

Doctor McCampbell said the meat consumption of the country is increasing.

"The consumer must look for high prices from now on," he said. "The capacity of the ranges is decreasing and any increase in the supply of beef must come from the farm, where the expense of production is much greater than on the range."

### MORE LIVE STOCK DEMANDED

It Means Less Marketing of Crops and Less Expense to Producer—Animals Consume Feed.

More live stock means less marketing of crops and less expense to those who produce the crops. Animals consume the feed at minimum prices and produce animal products—milk, cream, beef, pork, mutton, wool and other articles—at prevailing prices for finished products.

### LIVE STOCK NOTES

Keep more sheep.

Hogs and alfalfa seem to have been made for each other.

For the best bacon types of hogs, the Yorkshire and Berkshire are the most desirable.

Of all meats, it may be that of the hog will eventually prove to be the most indispensable.

Breeders of heavy horses have a great outlook, if they breed the kind the market demands.

# Save Money by Buying Right Now

For your consideration we quote a few of our many money-saving prices. You can do no better than buy these now. They are sure to cost you more later on, and a dollar saved is a dollar made.

### MENS RUBBERS

Storm rubbers.....\$1.00  
Rolled edged rubbers..... 1.35  
Arctic rubbers..... 1.75

### MENS ENGLISH SHOE

Buy now cost as much as selling price  
\$7.00 8.50 and 9.50

### HEAVY WORK SHOES

\$5.00 6.00 7.00 and 7.50

We are selling these solid leather Star Brand shoes at less than we can buy them for. Especially low price on this particular class shoe.

### LADIES RUBBERS
