Adminstrator.

CARE FOR VACCINATED HOGS

Lack of Proper Attention Has Result ed in Material Losses Which May Be Avoided.

(Prepared by the United States Department of Agriculture.)

Improper care of hogs following their immunization against hog cholera, administered in public stock yards and after arrival at their destination, has resulted in losses which may be materially decreased. The following instructions for the prevention of losses are valuable:

"Shipments should be made promptly after immunization, or should be delayed for not less than ten days. Truck hauls and shipments not exceeding 36 hours in length can be made promptly to advantage.

"Avoid crowding; allow stocker hogs relatively more floor space than fat

"It is important that drinking water be constantly accessible to the hogs, except in severe winter weather. If the car does not contain special water devices, a water trough, protected by slats over its top; should be securely fastened to the floor.

"Little or no feed is necessary during the 24 hours following inoculation, but clean water should be accessible. Short-haul shipments need not be fed in transit.

"When hogs arrive at their destination they should not be driven over the roads, but hauled from the car to the farm in wagons or trucks. Land and unlosd gently. Avoid chasing and unnecessary excitement in handling. In summer, unload where there is natural woodland shade or shelter pens; in winter, where there are suitable clean, bedded houses.

"Protection against rain should be

provided. "Do not permit wallows in pasture or lot. The use of wallows by recently inoculated hogs may produce pneu-

"For the first two weeks, if it is in season, allow shipped hogs limited

INFLUENZA AND WEAK BLOOD

RUN DOWN AND LISTLES CON-DITION MAY MAKE YOU A TARGET FOR THE "FLU"

BECAUSE BLOOD IS PROBABLY

AT THIS TIME OF DANGER, TAKE PEPTO-MANGAN—IT BUILDS RICH, RED BLOOD

No matter how well you usually are, f temporarily you're run down, you're target for the influenza.

Contagion always gets listless people first. Whether they realize it or not, their blod is thin and undernourished-in no condition to fight off the germs it meets everywhere.

It is a wise precation to take a good tonic at this time of danger-some well-known builder of red, vigorous blood, like Pepto-Mangan.

And if you did not think of this in time- if you are now recovering from a fight with influenza—your blood will need help for weeks after you think the danger is past.

Take no unnecessary chances. Get Pepto-Mangan and start taking it today. Pepto-Mangan is an effective blood builder that has the endorsement of physicians for years.

Pepti-Mangan is sold by druggists in either liquid or tablet form, just as preferred. There is no difference in medicinal value. But be sure you get the genuine Pepto-Mangan. Ask for Gud's Pepto-Mangan and be sure E. R. Thompson, D. S. Morrison and Jethro, and one daughter, Ophelia, the name is on the package. (Advertisement)

THE SOLDIERS MEMORIAL.

Last week we mailed a number of circular letters to people over the county that had been selected by the board of directors of the Polk County Soldiers Memorial Association, asking them to organize or consider themselves organized by townships to help the Association to wage a campaign for the Memorial Fund. Now we hope that each individual we have asked to help will consider themselves a member of the Association and help patriotically in this work. The directors have not as yet decided on the style of the memorial, but are considering a combination or fountain memorial made of granite, ten or twelve feet high, wi h a bronze Lynn school, and one of his associates figure of an American soldier with Miss Alice McBrayer, were married gun, a fine piece of work, a photo of last Saturday at Harris, N. C., by same being in my possession. The their pastor, Rev. D. S. Richardson.

ROYSTER'S FERTILIZERS Have stood the test

Because---

I maintain three very extensive chemical laboratories in which all materials are thoroughly tested. No harmful materials can ever enter into Royster goods. Our home and foreign markets are picked over for the choicest raw materials; then I formulate them in just the proportion which my life-time experience has found to be best for each crop for which the fertilizer is intended. The results of all this care is, naturally, a complete mixture which is really the "last word" in fertilizer. So, you see, I am justified in feeling proud of the Royster Products, which come from our fifteen upto-date plants.
