Has Done Much for Saluda.

The Infants' and Children's Sanitarium, which was established in 1914, and begun in one small cottage, has been doing a successful business, growing each year until now it has a capacity of forty babies and mothers.

The Sanitarium has four homes for mothers and babies, as well as a commodious dining room where the mothers take their meals. They also have a nice home for nurses. This is situated on the top of a mountain just above the depot, about 250 feet higher than the railway station. It has seven acres in its grounds. They have a staff of three physicians and ten nurses. D. L. Smith, M. D., is in charge.

The hospital has enjoyed the patronage of people from all of the southern states, and a great many of the northern states.

As the feeding of babies is the most important thing, the hospital has a well equipped diet kitchen where the foods for the babies are prepared. They use the purest milk, and the foods are cooked in fireless cookers. They have a dietitian in the diet kitchen, assisted by five young ladies from Winthrop College. From this diet kitchen babies are fed at the various boarding houses and hotels in the town at a reasonable rate.

Saluda climate seems to be especially adapted for these sick babies, for they are able to eat more food here and take care of it better than in the warmer climates.

There is also located at Saluda the Better Baby Camp, which has no connection with the Infants' and children's Sanitarium,

except the same physician is in charge. The Better Baby Camp is a charitable institution which takes babies from anywhere free of charge, and if one cares to, they can donate what they wish when leaving.

This hospital cares for about fifty babies and mothers each summer. It is supported mainly by the contributions of the Spartanburg people. It has been running along the same lines as the other institution.

Time only can tell the amount of good these two institutions are doing to humanity by restoring the precious babies to health and strength.

What's Art to This Senator?

Art received a terrible wallop at the national capitol when a senator decided he wanted a private door into his office so that folks could not break in on him unannounced. Summoning workmen, he caused to be torn out some of the finest art work on the walls of the senate side and then had a door installed.
