

LIVE STOCK

Pure Bred Live Stock

Solve Feeding Problem

The United States Department of Agriculture has just completed a study of the feeding problem of the farmer. In this study nearly 500 farmers were asked to describe what their feeding problems were and how they were meeting them. "Do you get more from your stock of improved breed than from a common stock of the same way?" there was a general agreement on the part of the farmers in feeding improved stock. Most replies gave figures on the extent of such improvement as shown by financial returns. The average was 100 per cent with an average of 39.6 per cent for improved stock. In general, pure bred stock exceeded the grades and the grades exceeded the scrubs.

As a result, live stock owners in the Department of Agriculture are advised that improved stock is likely to receive somewhat better care and yet, since good stock and good care go together so closely, the per cent given is about what others may expect when they improve their herds or flocks. While the lack of the preciseness of scientific work, it has as a background the experience of 20 years' experience of the practical live stock owners, the farm conditions. The figure given is similar to that of 40.4 per cent obtained by the department more than a year ago as showing the superiority value of pure breeds over common stock from a general farm of view.

When farmers, in discussing the superiority of pure breeds in utilizing the same interesting experiences. A farmer who grows states that his improved sows make 50 per cent better than scrubs on the same feed and care.

A South Dakota farmer told of selling three good grade steers on the market for \$55.36 apiece more than scrubs raised with them. An Ohio dairyman kept milk records on some common cows and pure breeds with the result that showed a production at the end of the year double that of the common stock.

Another farmer reported a feeding trial in which he kept well-bred cattle and scrubs in the same yard, all receiving the same ration. The good cattle feed while the scrubs remained

Steps of similar experiences indicate that well-bred live stock is an important means in reducing feeding costs and increasing financial returns. It is of interest to note, however, that no matter how strong the consent of opinion may be, there are generally a few on the negative side. Of 200 experiences, five or about 1 per cent, for one reason or another, had failed to succeed with improved stock. When taken into consideration with the foregoing data, points to a 99 per cent probability that pure bred and improved live stock will aid in solving economic feeding problems. Details of the department's study of feeding questions may be obtained from the bureau of animal industry, United States Department of Agriculture, Washington, D. C.

Proteins and Minerals

Necessary in Hog Feed

Considering the whole problem of animal, successful and satisfactory production with a minimum loss from disease when one has the problem a little, it is easy to see that the things necessary are a ration that provides as cheaply as possible plenty of proteins and minerals in the ration. And in getting this cheaply by the use of growing crops, we have gone a long way in reducing the sanitary requirements by eliminating chances of loss from some of the contagious diseases and parasites of the overcrowded hog lot.

LIVE STOCK NOTES

Buy a good bull Monday and on Friday you'll be better off.

Don't postpone on raising some pigs and getting into the business. It is better to start early to plan now than to start late.

Be sure to get the gifts and especially the piglets necessary if large litters of strong, healthy pigs are to be raised.

Every progressive farmer should have a pure bred live stock, and every farmer who needs records for his herd.

It is best to have more than one pig in the crop, alternating each year. This way troubles from parasites will be a minimum.

Don't feed any horns for domestic purposes. Even for purposes of deers, still do some damage, horns are a needless expense.

NEW CLOTHES FOR SCHOOL; GOWNS IN SUAVE LINES

FOR the little daughter, who must have new clothes for September wear, there are many new and attractive styles in frocks made of tubular materials that will delight her youthful heart. And furthermore, because of their simplicity, they do not present any difficulty in making. Tub frocks for juvenile wear are being shown in linen and gingham in all sorts of cheery colors and nearly all of them have for decoration simple designs in hand embroidery to relieve the severe lines of the mode.

Devonshire gingham is used in the little dress pictured here. The collar and cuffs are of white linen embroidered with bright-colored cotton yarns.

Devonshire Gingham Dress

The waistline is defined with two rows of cording and the collar ties with a little ribbon bow.

Dotted swiss voile and batiste continue as the most popular materials for party wear. Little frocks of these materials are elaborated with pin-tucks, smocking, hand-drawnwork and embroidery and are developed in shades of mauve, light blue, pink, rose, French blue and tangerine. Linens, in plain colors generally, have collars and sleeve facings of the same material in

subdued colors that do not form too harsh a contrast with the satin. The draped skirt of this model is caught in a puff over the left hip and falls in soft folds to the ankle. It is balanced on the right side by the long fold of a false sleeve draped at the shoulder. The waistline is low and is caught by a narrow belt of satin.

For the slender woman a garment of this kind provides an attractive variation of the mode, but if one is short or plump the severely straight

Attractive Dinner Gown

contrasting colors, embroidered with tiny flowers in simple patterns.

Coats, capes and suits for junior girls incorporate many of the same style ideas as those of their elders. Youthful two and three piece sports suits of tweeds and homespuns, in color mixtures, have made their appearance as well as a multitude of gay little knitted sweaters suitable for wear with the knicker and blouse, or skirt and blouse combinations that are at present in favor.

While there is a uniform opinion in style circles that the straight-line silhouette will be the most popular in coats and suits for fall there is a considerable latitude of opinion as to whether gowns will conform to straight lines or not. So many design-

ers are favoring drapery that it is sure to become an important part of early fall fashions.

Generally speaking, the draped gown is at once clever and extremely simple. Where drapery is used, the waist or blouse portion follows the easy lines of the present mode and draping is confined to the sleeves and to one side of the skirt. Embroidery is the most popular means of trimming and there is a noticeable absence of ruffles, plaits, panels or other elaborations.

The attractive dinner gown shown here is of black satin ornamented with machine embroidery, the design done in French knots. The embroidery is in

LESSON FOR SEPTEMBER 2

PAUL, THE APOSTLE

LESSON TEXT—Acts 22:3, 6-10; Philippians 3:4-14.

GOLDEN TEXT—"I press toward the mark for the prize of the high calling of God in Christ Jesus."—Phil. 3:14.

REFERENCE MATERIAL—Romans 1:9-17; 15:15-21; II Cor. 11:1-12.

PRIMARY TOPIC—How Paul Became a Christian.

JUNIOR TOPIC—Paul the Missionary.

INTERMEDIATE AND SENIOR TOPIC—Paul the Dauntless.

YOUNG PEOPLE AND ADULT TOPIC—Paul's Contribution to Christianity.

Paul's name stands second to none in the annals of history. The story of his life is of perennial interest.

I. His Birth. (v. 3 of Phil. 3:17).

He was born in Tarsus of pure Hebrew stock. He could with legitimate pride boast of godly ancestry. It is highly important that each generation should so live that no handicaps be placed upon their children.

II. His Home Training. (3:5).

His parents were pious people and carefully reared him according to Jewish standards. Most religious leaders spring out of such homes; for example, Moses, Samuel, Timothy. Stern principles of integrity were inculcated in him thus giving him strength of character to impress the world. He was strongly attached to the peculiarities of the Jewish religion. The heroes which molded his life were such men as Joseph, Moses, David, Isaiah instead of Achilles, Hercules and Ulysses.

III. His Education. (Acts 2:3).

1—His Patriotism. He was brought up to love his nation. He proudly affirmed, "I am a Jew." Paul was a nationalist of the true type. Children should be taught to love their nation.

2—A Love for the Bible. The Scriptures were to him the very Word of God. What was found written therein was the final word for Him. Loss of love for the Bible and implicit faith therein is a tragedy.

3—Zealous for God. (Acts 22:3). The word zealous literally means "to boil." Zeal without knowledge is better than no zeal at all.

4—Conscientious. His supreme aim was to possess a conscience void of offense. Conformity to the dictates of conscience is demanded. It is the law of life for every man that because of the blight of sin the conscience needs to be taught by God's Word.

5—He Had a Trade. Every Jewish boy, regardless of his father's wealth, was taught a trade. It was a saying among them that, "He who failed to teach his son a trade, taught him to steal." This would be a good plan in our modern days.

IV. His Conversion. (Acts 22:6-10).

1—On the Way to Damascus. (v. 6). He was the enemy of Christ and was on his way to Damascus authorized to bring bound such Christians as might be found to Jerusalem to be punished. While on this journey he had time for reflection and conscience began to work.

2—A Light from Heaven. (vv. 6-9). As this light burned through the sky over him, he fell to the ground humiliated. Accompanying the light was a voice saying, "Saul, why persecutest thou me?" Upon inquiry as to who was speaking, the Lord declared that it was Jesus of Nazareth whom he was persecuting.

3—An Honest Inquiry. (v. 10). He was willing to do what the Lord willed, so he was instructed to go to Damascus where fuller light would be given.

V. His Estimate of Christ. (Phil. 3:7-9).

When he came to know Christ, he counted all but loss in comparison with Him. He saw Christ as the supplier of righteousness. He who has Christ and His righteousness has everything worth while.

VI. His Transcendent Aim. (Phil. 3:10-14).

1—His aim was to know the power of Christ's resurrection, even that he might be made conformable to His death and have fellowship in His sufferings.

2—He desired to attain unto the resurrection of the dead. This refers to the first resurrection in which the believers shall come forth from among the wicked dead.

3—He pressed toward the mark. He did not count that he had yet attained. He depreciated his present attainments, perceived the dignity of his calling and pressed forward with all his strength in order that he might win the prize. The conditions which determine growth are first, a decided dissatisfaction with present attainments; second, perception of the height of truth, and third, a resolute determination to attain at whatever cost.

Humanity. Humanity is indeed a happy lot, when we can repeat ourselves in others, and still be young as they.—Dickens.

Evidence of Immortality. Our dissatisfaction with any other solution is the blazing evidence of immortality.—Emerson.

The Age Before Us. Our ancestors have traveled the iron age; the golden age is before us.—St. Pierre.

Resinol does wonders for poor complexions

Underneath most unattractive skins is a clear, pleasing complexion—all that is needed is the proper treatment! It is surprising how often a brief use of Resinol Ointment and Resinol Soap will clear away blotches, redness and roughness and give the skin its natural freshness and charm.

If your skin isn't just what you want it to be, ask your dealer for Resinol Soap and Ointment.

Clear Your Complexion with This Old Reliable Remedy—HANCOCK SULPHUR COMPOUND

For pimples, black-heads, freckles, blotches, and tan, as well as for more serious face, scalp and body eruptions, hives, eczema, etc., use this scientific compound of sulphur. As a lotion, it soothes and heals; taken internally—a few drops in a glass of water—it gets at the root of the trouble and purifies the blood.

Physicians agree that sulphur is one of the most effective blood purifiers known. Remember, a good complexion isn't skin deep—it's health deep.

Be sure to ask for HANCOCK SULPHUR COMPOUND. It has been used with satisfactory results over 25 years.

A Fine Tonic. Builds You Up Prevents and Relieves

BABIES CRY FOR "CASTORIA"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians recommend it. The genuine bears signature of

Wm. H. Fletcher.

Being sorry for others is often a mild form of boasting.

Aspirin

Say "Bayer" and Insist!

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-two years and proved safe by millions for

Colds Headache
Toothache Lumbago
Earache Rheumatism
Neuralgia Pain, Pain

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Advertisement.

There is no sufficient recompense for an unjust slander.

Old Colored Mammy Knew What to Do

"I was distracted with fear when my little 9-month-old baby had dysentery, but an old colored mammy told me to give her Teething and she has given me no more trouble since," said Mrs. Nettie Barnes, South Bay, Palm Beach Co., Fla. "With my last baby I got Teething before he began teething and he was never sick a day."

It is not always safe to follow the advice of old colored mammys, but when they are as well informed as this one who recommended Teething no advice could be better. All mothers can inform themselves as to the proper care of their babies by consulting Moffett's Baby Book, which can be had free by sending 30c to the Moffett Laboratories, Columbus, Ga., for a full size package of Teething.—(Advertisement.)

There is no pain so great that time will not soften it.

A FEELING OF SECURITY

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy. The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything. It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large. However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

The opportunity is often lost by deliberating too long.
