## Polk County Agent

J. R. Sams Department

TO THE MERCHANTS OF POLK COUNTY

There seems to be a feeling among some merchants in Polk County that the Farmers Federation Warehouse means to encroach upon their private property.

To all such, we desire to say there is no such intention. We have need for every merchant who is conducting a fair and legitimate business and giving actual service to humanity. The farmer is both a producer and a consumer. The greatest of all consuming classes. His wants are never supplied as long as he has a dollar. Neither the farmer nor his marketing association will ever become a retail channel of commerce; but there are some things which enter into the cost of production on the farm that can be handled cheaper and better through a farmers cooperative buying and selling association,

than by any other agency. These classes of merchandise, such as fertilizers, lime, farm fencing, feed, flour etc., which are fundamental in agricultural production can and will be handled by their own agency.

This does not declare war on the merchants who desire to handle these lines of goods. In Spartanburg S. C., I have been informed that there are within the corporate limits of the city more than 1200 dairy cows producing milk and butter in competition with the farmers dairy cows, and doubtless there are within the same town thousands of hens laying in competition with country hens, and the majority of those cows and hens are the property of merchants and other business men—The farmer never questions the right of the merchant to own a cow, hen, garden, pig or any other accessory to his business that competes with the farmers business. Come along now brother merchant; lets reason together and see if there is not a common ground of consistency where we can stand and be fair with each other and be helpful to each other and all pull together for the uplift of all classes in the county.

### TO STOCK HOLDERS OF FARMER'S FEDERATION, AND ALL FARMERS, OF POLK

The campaign for sowing head lettuce seed for the coming season is almost over—

The next step will be the preparation and transplanting to the open fields. Those who have failed to sow seed beds, should apply at once to Mr. P. C. Squires, Federation Warehouse at Tryon N. C., for plants to be set in garden and fields next Spring

The second project will be to have every grower of lettuce procure beet seed from the Farmers Warehouse and plant their beds to beets to be shipped cooperatively just a little later on.

Then the third project of the Farmers Federation will be to grow early Irish potatoes next spring. Arrangements have already been made to purchase and store two car loads of certified Irish potatoes seed to be planted next spring. Now this is as it should be. If the farmers ever sell cooperatively; they must grow cooperatively.

These three crops will all put cash into the farmers purse at the time of year when cash is scarce.

Another thing The Farmers Federation will do is this: Many county farmers have asked me to take orders for fruit trees. This can be done by the Federation, better than through the County Agent. So all farmers and orchard men needing such stock should call on Mr. Squires and have their needs supplied.

Again, The Farmers Federation will install a forcing plant to grow cabbage, tomato, pepper and other plants to supply the needs of Polk County without sending so much money abroad for these necessities.

What we need and desire is such a broad cooperative movement that it will coordinate every line of business in Polk County and will create such a friendly spirit between banks, merchants, farmers, garage men, manufacturers etc., that will make them all feel as one Family.

### HOLD PLANTING BEES IN SIXTEEN COUNTIES.

Raleigh, N. C., Nov. 21 Planting "bees" arranged by home demonstration agents on various school grounds will be held in sixteen counties during the next few weeks under the supervision of F. E. McCall, landscape architect for the State College and Department of Agriculture. The first of these was held at the Middlesex High School on Nov. 14 as a part of the Nash County Beautification Campaign put on in that County by Mrs. Effie Vines Gordon, home agents.

About 500 people including the school children took part in the planting at Middlesex. Mr. McCall made a complete map of the grounds in relation to the school building and then made suggestions as to the kind of native and purchased shrubs and plants that should be set out. One day was spent in locating native shrubs in the adjacent woodlands and the next day spent in planting. Everybody helped. Some of the patrons brought their wagons and used these to haul wood, mold, others brought choice plants from their home gardens, some went to the woods after plants and the remainder stayed on the grounds to dig holes and plow furrows. When the day was over, the bare grounds of the Middlesex school presented a different appearance from what was seen when the work was begun.

It is planned to have occasions like this in the other 16 counties just as Mr. McCall can get from one to the other. He states that the home agent and school principals are rendering excellent cooperation in the movement and that the idea is spreading from the one school house

so landscaped in each county to various others and that many private home owners are following out the suggestions made at the planting bee to beautify their home grounds.

### NORTH CAROLINA WEEKLY INDUSTRIAL REVIEW

## To The Feeder of Dairy Cows

We do not claim to know more about feeding dairy cows than our customers — our business is selling feed. We do know, though, that the men in this community who are most successful with dairy cows are feeding

## SUGARED SCHUMACHER FEED

It is to our advantage to handle only those feeds that produce best results for our customers. We investigate them all — and that's why we handle Sugared Schumacher Feed. It's made by the Quaker Oats Company—the largest manufacturers of feed in the world. It is composed of a combination of Corn, Oats, Wheat and Barley finely ground, correctly balanced and sweetened with cane molasses. That the Quaker Oats Company knows how to make dairy feed is proven by the results our customers get—that's what YOU want and that's what WE want. Yes, it is a good hog feed also.

For Sale By

Farmers Federation, Tryon, N. C.

## WINTER SHOES

That Will Stand Winter Weather

Winter weather certainly shows the quality of a shoe in three orders. Takes good leather and good workmanship to stand rain and mud—and even those who wear rubber boots will get caught without them often. Our shoes are made to keep their shape—their good looking style lasts—they stand "rain out" and keep on being comfortable. You will like them.
