# President and His Critics Accuse Each Other of **Playing Politics.**

By EDWARD W. PICKARD DRESIDENT COOLIDGE, personally

in conversation with the Washington correspondents and then through a White House spokesman, told the country last week that the critics of his administration were "playing politics" and should not be taken too seriously. Mr. Coolidge alluded apparently to the investigations of the Department of Justice for failure to proceed against Secretary Mellon's aluminum company, to charges by Senator Norris that the President exerted questionable influence to keep the tariff board from making sugar tariff recommendations before the election of last fall, and to attacks made on the federal trade commission. Mr. Coolidge said these charges were unfounded, that the government was not derelict in enforcing the law and that such attacks were seasonal, coming in years in which Presidential elections were held.

No sooner were these statements made public than Senator' Pat Harrison of Mississippi arose in the senate to express his great indignation at them. He described Mr. Coolidge as a "matchless politician" and said: "It does not become a resident of the

evacuated Bonn and the Belgians prohibition. moved out of Moers, Dusseldorff and Aix la Chapelle. Thus 2,500,000 returned to the sovereighty of the reich. It was said in Paris that the occupation forces would be reduced to 60,000 as soon as Germany entered the league. But the official view in Berlin is that after Germany has entered the league and all the provisions of the Locarno pact and the Dawes plan are carried out, any occupation of the Rhineland will be an incongruous ob-

stacle to general pacification.  $\mathbf{F}_{\text{senate's consideration of the tax}}^{\text{AIRLY rapid action marked the}}$ bill last week, and on the controversial features the "regular" Republicans and Democrats voted together, sustaining the finance committee's action and defeating the efforts of the radicals to amend the measure. Toward the end of the week the proposed repeal of the estate tax and of the publicity provision of the present law were the most interesting features remaining to be acted upon. It is believed the house will accept the senate's changes which make greater reductions in the middle brackets.

THE house received from committee the War department appropriation bill, which calls for an army of approximately the existing strength from the presidency of the company in and recommends the expenditure dur- March, 1925. ing the next fiscal year of \$339,581,000.

This is nearly \$7,000,000 more than last year's appropriation and \$1,087,-000 above the budget estimates. Of last March, left a fortune of some the total amount military activities \$50,000,000. marched out of Cologne, the French | cord with its new policy concerning

ENTUCKY authorities gave an ex-K hibition of efficiency last week in protecting a prisoner from would-be lynchers and this was followed by the swift meting out of justice to the offender. Edward Harris, a negro, was accused of murder and an attack on a woman, and when a mob gathered at Frankfort, where he was confined, a thousand National Guardsmen with all equipment, including tanks, were called Jout, the threatening crowds were dispersed by tear gas and Harris was safely transported to Lexing-

ton. There he pleaded gullty to the criminal attack and was sentenced to death on the gallows on March 5.

WILLIAM M. WOOD, millionaire resident of Andover, Mass., and former president of the American Woolen company, committed suicide near Daytona, Fla. He had been in poor health for several years and had been despondent since his son was killed in an automobile accident in 1922. He also had grieved over the partial abandonment of his plans to build a model village for the thousands of employees of the woolen company. His associates did not approve

of the expenditure of millions for this philanthropic purpose. He retired

WILLIAM A. CLARK, former senator from Montana, who died by his alleged marriage to a woman in Missouri in 1869. Attorneys for the Clark estate say they know nothing of these women or of the alleged marriage.

DOINGS IN THE TAR HEEL STATE \* NEWS OF NORTH CAROLINA TOLD IN SHORT PARA-GRAPHS FOR BUSY PEOPLE

\* Wilson.-Wilson county's handsome new half mill on dollar courthouse was dedicated with most impressive ceremonies which were presided over by Judge M. V. Barnhill of Rocky Mount. Statesville .- J. H. McElwee, pioneer tobacco manufacturer and for many years identified with Statesville's industrial development, died at his home here. Mr. McElwee was 91 years of age and was born in York county,

S. C. North Wilkesboro .- Rev. Jesse V. Yates, of Rina, Ashe county, died at the Wilkes hospital as a result of gun shot wounds received on January 16 when he fell over a log while out hunting, shooting himself in the side. High Point .- A total of 68 building permits were issued here during the month of January, aggregating \$240,-810. which is about four times the

amount of building for the same month last year. Monroe .--- The American Legion auxiliary of Monroe has purchased a quantity of Crepe Myrtle and other ornamental shrubbery with which it will beautify that portion of highway No. 20, leading between Monroe and Lake

Lee, a distance of approximately two miles. Asheville-J. B. Bianchi, Italianborn aritst, charged with annoying little girls in motion picture theatres, was sentenced by Police Judge Cameron MacRae to serve 60 days in jail and not to enter a place of amusement

in Asheville for two years. Grenesboro.-The two year old daughter of M. B. McLean, Associated Press telegraph operator, in this city, swallowed an "all day sucker," a piece of candy on a stick, swallowing stick and all. The child is in a serlous condition.

Greensboro .- Robert Sockwell, farmer living near this city, appealed to the police here for help in watching for two loads of hay that he said some unidentified persons took from his place. It was the first time that a "hay bandit" had been reported. Wilson .- Dr. C. S. Eagles, of Wilson, R. F. D. 4, has a nine-year-old daughter, Kathleen, in the ninth grade and is keeping up with her twin brothers who are one year older than she. She has music in addition to the regular studies of her grade. She recently won a prize in a spelling con-

test in which her fourteen-year-old brother competed.

Fire blight has been doing untold damage to the orchards the past year. Orchard specialists at the Wisconsin College of Agriculture are urging fruitmen to remove all blighty branches and twigs from apple orchards which have been badly hit with andwiches may be prepared of gan'e. fire blight.

The growers are being advised that fire blight causes the greatest damage to young trees in that the fruiting wood is destroyed. This blight occurs on apples, pears, cultivated and wild crabs and hawthorns. The bacteria causing the disease work under the bark where they are protected and cannot be reached directly by spray.

The state investigators have found that the disease is most easily distinguished before the leaves begin to fall. For most thorough eradication, they recommend that the work be done on a community basis for if farmers in every community attack the disease pairs, trim off the crusts and cut at the same time it can be reduced to a minimum in every locality.

Diseased branches can be easily distinguished by the leaves which have a burned appearance. Excessive pruning should be avoided and tools and wounds should be disinfected. R. E. Vaughan of the station staff lists a solution of mercuric chloride and mercuric cyanide as the most satisfactory disinfectant. These chemicals may be obtained in tablet form from any drug store. To obtain the correct solution Vaughan recommends one tablet be dissolved in one pint of water. This solution is extremely poisonous and must be kept away from children and stock. Since it corrodes metals it must be carried in earthenware or glass fars.

Cover with the remaining rounds. Ar-The specialist warns against the range sandwiches on hot plates and careless use of the pruning knife since pour over the hot chicken gravy. the germs may become smeared on the Serve with celery salad. tools and can thus be easily transferred to all trees with which these tools come in contact.

### Concord Is Regarded as Most Satisfactory Grape

The most satisfactory grape for commercial purposes is unquestionably the Concord. Other varieties may serve to supply for specific purposes, but this variety is more widely known and more highly regarded than all others. This variety is more likely to succeed over a wider range than the others and it responds in high degree to indifferent attention.

Spring planting of grapes is prefer-

able to fall planting in most sections, but it is possible that fall planting might be successfully done.

For working with a team the vines of Concord may be spaced eight feet apart in the rows with the rows eight

all the speeches here are to have a political tinge. There are political speeches made here, and we invite the President to make his political speeches, whether he makes them to the farmers in the West or the chamber of commerce in New York. He has not made a single speech from that in New York to the fly-by-night journey to Chicago but that was an effort to win favor with the people-playing politics in his speeches. When he persuaded some gentlemen on the other side of the aisle to change their views with respect to international peace in the world he performed one of the seven wonders of the world."

A MONG the important statements of the President's attitude, emanating from the White House are these:

The President is disappointed by the postponement by the League of Nations of preparations for a disarmament conference, and if the league's conference does not materialize, Mr. Coolidge will return to his original plan to convene in Washington another conference on further reduction of naval armaments.

Mr. Coolidge is still as much opposed as ever to the United States joining the League of Nations, believes the country still overwhelmingly determined to stay out, and regards our entrance into the World court not a step toward the league, but a demonstration of our care to avoid league entanglement.

The President condemns publicity statements emanating from the War and Navy departments charging deterioration of our national defenses, characterizing them as misrepresentations, designed to obtain larger anpropriations. Mr. Coolidge regards the condition of the army and navy as satisfactory.

G ERMANY'S application for mem-bership in the League of Nations probably will have reached Geneva before this is published and it is expected that Sir Eric Drummond, the secretary general, will convoke an extraordinary session of the council at once to act on it. The next procedure will be a special meeting of the assembly, probably in March, to take Germany in formally. The foreign affairs committee of the relchstag by a vote of 18 to 8 decided to apply for membership and the presidents of all the German states were summoned to Berlin for a final discussion of the form of application. Germany will be the fifty-sixth member of the league. Occupation of the first zone in the

S MUGGLING operations along the United States-Canadian border are to be thoroughly investigated by a special committee of the Canadian parliament as a result of sensational charges made by H. H. Stevens, minister of trade and commerce in the former Conservative government. After asserting that the smuggling during the last year had caused the Canadian government a loss of \$200,000,000 in revenues. Mr. Stevens declared that a notorious crook, perjurer, thief and smuggler had been promoted to be chief customs officer at the port of

Montreal though the cabinet ministers knew of his activities. George H. Boivin, minister of cus-

toms and exclse, told parliament he was willing to institute the investigation demanded. He said the immense smuggling of silk, cotton goods, cigarettes and tobacco into Canada, with return cargoes of whisky, was not confined to the Quebec border. Conditions at Toronto, Windsor and right through to Vancouver needed the thorough probing which the government was prepared to give. Conservative leader Arthur Meighen expressed entire accord with the proposal to hold a wide open public inquiry.

A NOTHER attack on the dry laws, from a rather unexpected source, came last week. Rev. Dr. James Empringham, national secretary of the Church Temperance society of the Episcopal church, announced that a poll of the 20,000 members of the society showed an overwhelming preponderance in favor of modification of the Volstead act. Consequently Doctor Empringham reported to a meeting of Episcopal clergymen in New York that the society as a whole was

in favor of such modification, for these reasons: "1. Because the effect of prohibition

has been to put an end to scientific temperance teaching. "2. It has discouraged the consump-

tion of wine and beer and increased the demand for distilled liquors, which today are mostly poisonous. "3. It has resulted in increased

drinking among young people. "4. It has brought about disrespect for all laws.

"5. It is class legislation, discriminating in favor of the rich.

"6. In our survey we found intem perance increased."

G RADUALLY some of the truth concerning the renunciation of Crown Prince Carol of Rumania is leaking out. The stories coming from Bucharest reveal a palace scandal that reflects seriously on Queen Marie and Prince Babu Stirbey, her favorite, whose power in the government the opposition party has been trying to destroy. Gregoire Philipescu, a deputy, has been issuing a series of posters lampooning the prince and the latest report is that Babu has fled from the capital and that the queen has followed him. Philipescu's paper accuses Prince Babu of robbing the Rumanian deputies and of falsifying the parliamentary reports to deceive the people.

A NOTHER gallant rescue of sailors on the storm-swept Atlantic marked the week. The crew of the sinking Dutch steamer Alkaid was taken off by the men of the Hamburg-American liner Westphalia in midocean, the rescuers displaying great bravery. Captain Fried and his men of the President Roosevelt, who saved 25 men from the British freighter Antinoe, have been awarded gold, silver and bronze medals by the British government, the British board of trade and Lloyds.

RTUGAL had another of its incipient revolutions the other day under the leadership of Col. Justiniano Esteves. But the government put it down with neatness and dispatch and the leader and his lieutenants were arrested while they were attempting to capture the barracks at Campolini. The day before two batteries of artillery revolted and were shelled into submission by the fortress of San George.

In Greece a communist plot to as sassinate Premier Pangalos and other government leaders was uncovered by

a raid on a Communist center. CINANCE MINISTER DOUMER of

r France announced that the government was ready to receive offers from any American syndicates for the purchase or lease of the operation of the telegraph and telephone system and the monopolles in tobacco and matches. An American group, reported to be backed by the American Tobacco company, recently offered approximately \$1,000,000,000 for a 99-year monopoly on the sale of matches and tobacco. A syndicate has been dickering for a long time to take over the operation

Durham .- Contract for a three-story Sunday school building as an annex to the Edgemont Baptist church was awarded by the congregation to T. \$25,000. The complete plant, including heating system and equipment, is expected to cost about \$35,000. High Point .- The city of High Point will make an effort to borrow \$75,000 immediately to meet the bills that are due and which the city does not have sufficient funds to pay. The city council in session took cognizance of the fact that there are outstanding obligations which cannot be met satisfactorily unless money is borrowed. Asheville .- Alleging that the construction of the new roundhouse of the Southern Railway Company and

the establishment of the new stockyards have damaged greatly residential property which has been held as such for the past 50 years, Mary C. McDowell has filed suit in superior court against the railroad for \$250,000. Tarboro.-Jule Pender of No. 7 township, died from injuries received in an automobile wreck. Bender was in the rear seat of a car driven by a negro man named Jet Lawrence. About a mile out of Tarboro on the state highway between Tarboro and Leggetts, Lawrence lost control of his car and it turned completely over.

Wilson .- After safely delivering the last school truck full of children to their homes between Elm City and Wilson, truck No. 69 stalled on a crossing and a northbound Atlantic Coast Line train crashed into it and completely demolished it. The driver, Fred Narron, of this city, was seriously injured, and is in a local hospital. Raleigh .- Thieves broke through and stole 29 Fords and seven automobiles, but the registration department of the state recovered 64 Fords and 31 other kinds of machines, the record performance of the state's whole life. Chapel Hill .- The school of Engineering of the University of North Carolina has just decided to add a department of chemical engineering. This gives the school four departments for there are already departments of civil, electrical and mechanical engineering.

Madison .- Perhaps the biggest average of the season at the local co-op warehouse was made by W. G. Sharpe, New Bethel township farmer, who received \$119.84 as a first advance on 416 ponds of tobacco. Mr. Sharpe had 314 pounds that graded at \$31 per hundred pounds.

Asheville .- Representatives of civic and commercial organizations throughout western North Carolina will attend an all-day conference in Asheville, February 26, for the discussion of mutual problems and the formation of a regional campaign for boosting this section.

Greensboro .- Sale of three automobiles by the United States government at fifty cents each net for the government was recorded in the office here of the celrk of Western North Carolina district. Three others were sold for net amounts of \$20.50, \$16 and \$16.10.

feet apart. The trellis for Concord should be constructed with posts and wire. It is customary to space the posts so that three vines are con-W. Poe, the contract price being tained between two posts. It is suggested that the single-stem four-cane Kniffen method of training be used. With this method two runs of wire are necessary the lower may be spaced three and one-half feet above the ground level while the upper is about two feet above. Usually the posts must be driven each spring after the soil has thawed, and the wires are then tightened.

### Many Young Fruit Trees Are Killed by Rodents

Many young fruit trees are killed every year from being girdled by mice and rabbits. The best way to protect trees against these pests is to put a cylinder of quarter or half-inch mesh wire cloth up to the lowest side branch around the trunk of each tree. If the wire is firmed down in the soll and fitted so as not to chafe the tree when rocked by the wind it can be left in place until the tree is so large as to no longer need its protection.

Other temporary guards such as a band of cornstalks or paper can be used and replaced each year. Most of the preparations for painting the trunk have proved unsatisfactory.

## Ladybugs Are Retailed

to Orchardists in West Clark Turner, who lives in the state of Washington, is conducting a unique industry-he supplies ladybugs to orchardists. According to a news dispatch, Turner sold nearly 3,000,000 of the insects last year. He gathers them from the crevices in the Cascade mountains where they are numerous. They are distributed in the orchard about 100 to an acre. Since they breed several times a year they multiply rapidly and soon destroy many enemies to fruit trees such as the green and woolly aphids, peach-tree lice and other pests.

#### Prune All Year Round Pruning of fruit trees is done by

kept from living rooms and offices or some people practically all the year scrupulous care exercised to see that round, but it is wisest for the amano such material is placed in drawers teur to prune fruit trees in late winter where it can leave an attractive odor or early spring. They should be or fragments of food, the roach nulpruned during the dormant or sleepsance can be largely restricted to places ing period of the trees. It is best where food necessarily must be kept to wait until the latter stages of the In such places the storage of food madormant period because the wounds terials in insect-proof containers or in will then heal without cracking and ice boxes, together with thorough-gosplitting and you will get better reing cleanliness, will go a long way to sults in general. ward preventing serious annoyance.

Thin Out Bearing Trees The branches of bearing trees should be thinned out moderately, and those which are to continue the main framework of the tree should be head ed back moderately to outward grow ing branches. The centers of the tree should be kept reasonably open i order that the fruits will color better and in order that the growth of new shoots on the main branches may b maintained. Clipping of all lateral is expensive and decreases yields.
