

NATIONAL LECTURER TO SPEAK IN TRYON

(Continued from page 1.)

splendid service during the Revolution, was selected for the task of designing the capital city that was to be. So well did he do this work that the L'Enfant plan remains to this day not alone a fulfillment of his dream, but a guide to the future.

From 1824 until 1901 this plan was neglected through political pressure and bad taste, but since the establishment of the Constitution of Fine Arts it has again been taken up, the deviations from it corrected, and further developments based upon it.

Along in 1900 there was a feeling at Washington that the time had come to make permanent improvements in the national capital, and President McKinley called the governors of the states to Washington and there was much discussion as to what could be done. In 1901 Senator McMillan of Michigan, chairman of the Committee on the District of Columbia, secured the passage of a resolution directing that committee to report a plan for the improvement of the park system of the District. For ten years Senator McMillan devoted his energies and resources to this work, and in 1910 President Taft appointed the permanent Commission of Fine Arts, of which Mr. Moore, who had been associated with the Michigan senator, has been a member ever since.

Of the wonderful things which this commission has accomplished, of the

still greater hopes and plans they entertain for our country's great political center, Mr. Moore will tell from his personal experiences. Mr. Moore is a man of unusually charming manner, a deep cultivation and a sincere love for the beautiful, and everyone will find something in what he has to tell that will be interesting and instructive. With our own very small but budding hopes for a town, with a unified plan and some claim to beauty beside that which nature provides, our citizens will find inspiration in the great things that have been done for national civic improvement.

The list of patrons and patronesses for the lecture include:
