New Mexico's Mountain Heights Have Been Recorded Wrong For Years!

By Sanky Trimble
SANTA FE, N. M. — (AP) — A fellow who is on speaking terms with mountains has played back with maps of New Mexico. Because of his insistence, the Department of Interior's Geological Survey has admitted that what used to be considered the highest peak in the state isn't the highest peak at all. And what's more, a

13,306, 13,275 and 13,240 as they were supposed to be. Checkup Started. State officials started checking. A little embarrassed, Geological Survey officials admitted the only authority they had for the figures was a pencilled notation on a survey made in 1898-99. Walter then took George Forney, engineer in charge of the U.S. G.S. office at Los Alamos, N. M., all over Northern New Mexico, climbing mountains. After checks and rechecks, Walter became confident Wheeler Peak, northeast of Taos, N. M., was the state's highest at 13,151 feet, roughly. The Geological Survey agreed. The division engineer wrote: Conclusion Accepted. "I feel that it would be safe to make the statement that the elevation of South Truchas does not exceed 13,110 feet, leaving Wheeler Peak as the highest peak in the State of New Mexico."

Robert O. Davis, Rocky Mountain division engineer for the U.S.G.S., cautioned, however, that "it is somewhat risky to say that an elevation is exactly so and so until numerous determinations have been made." He added his office hopes to make soon a "complete topographic survey" of the area to iron the whole thing out properly.

Changes Mountains
Meanwhile, Walter — who spent more than 10 years close to the bosom of the three Truchas — has changed loves. Now he's photographing Wheeler Peak from every angle.

He's climbed the peak twice and shot his pictures from such intriguing places as Bull of the Woods Mountain, Old Mike Peak and one he can't find a name for in any of the books or on any map.

Next, Walter's statehouse buddies predict, he'll be forcing someone to give that poor nameless mountain a monicker.

mountain formerly not even in the running now has become New Mexico's loftiest.

Harold D. Walter, assistant purchasing agent for the state and the man responsible for all the fuss, started fooling around with New Mexico mountains in 1933 as a photography hobby.

He climbed, rode horseback and slid all over the three Truchas Peaks north of Santa Fe, plus others, and took pictures from every angle. On one such trip, a borrowed altimeter indicated to him that the three peaks were not
