Pakistan Colonel to Attend School

KARACHI — (AP) — Pakistan Army officials have announced that Col. Altaf Qadir has been assigned to attend the U. S. Army Command and General Staff College at Leavenworth, Kas. They say a vacancy in the school has been allotted to the Pakistan army.

## Miss Pauline Mason Becomes Bride of Frederick Earl Smith

Miss Pauline Mason, daughter of Mr. and Mrs. Michael Mason, of Beaufort, RFD, and Frederick Earl Smith, son of Mr. and Mrs. A. T. Smith, of Beaufort, were married in the Core Creek Community church on Monday, September the sixth, at six-thirty o'clock in the evening. The Reverend Winfrey W. Davis, pastor of the First Baptist church, Beaufort, performed the double ring ceremony.

The candlelight ceremony took place before a background of pine, palmets, and clematis while glowing tapers and white gladioli and dahlias added to the beauty of the scene.

Prior to the ceremony Mrs. Grayden Paul, organist, gave a recital of wedding music, and Misses Marie and Lorna Smith, sisters of the groom, sang, "I Love You Truly."

The bride entered the church upon the arm of her father by whom she was given in marriage. She wore a dress of navy blue crepe with gray accessories and a white aster shoulder corsage.

Mrs. A. G. Cowart, of Atlantic, was maid-of-honor, and -bridesmaids were Misses Dorothy Taylor, of Bachelor, Helen Simpson, of New Bern, and Lulabelle Dickinson, of Beaufort, RFD. They wore dresses of crepe.

The bridegroom chose his father as best man. Ushers were A. G. Cowart, of Atlantic, and Robie Lee King, of Beaufort.

Mrs. Mason, mother of the bride, wore black with a white corsage and the bridegroom's mother, Mrs. Smith, was attired in figured crepe.

Following the wedding the bridal couple left for a trip to Virginia after which they will be at home in Beaufort.

Mrs. Smith was graduated from the Beaufort High school this spring.

Mr. Smith is also a graduate of the Beaufort school, 1947, and is attending the school for electricians at Cherry Point.

The outlines of the fort built by Sir Walter Raleigh's lost colonists' at Roanoke Island, N. C. has been definitely located by recent archeological surveys conducted by J. C. Harrington, archeologist of the National Park Service.

The site of this, the first English attempt to colonize within the limits of continental United States, is now the Fort Raleigh National Historic Site.

Within a stone's throw of the original fort site today, Paul Green's symphonic drama, THE LOST COLONY, is being presented for its eighth season as one of America's most outstanding outdoor theatrical productions.

The show is presented during July and August and until Labor Day in The Waterside Theatre here each evening (except Monday and Tuesday).

R. H. Atkinson, in charge of Fort Raleigh National Historic site for the Park Service, announced as the Washington story was released that plans are already underway to excavate the site of the original fort and rebuild the same just as it appeared in 1587, insofar as the shape is concerned anyway.

In the story released from Washington, Atkinson pointed out additional data about the recent find. He said:

"A. E. Demaray, acting director of the National Park Service, has reported to the Secretary of the Interior J. A. Krug that the shape of the fort, as indicated by these excavations, resembles the fort built by the colonists at St. Johns Island in Puerto Rico a few weeks before they arrived at Roanoke Island. Demaray quoted Mr. Harrington as saying: 'If the plans of these two forts are compared with the conventional small earth work of the period, it is evident that Governor Ralph Lane, or his fortification expert, had some very definite, but unconventional ideas of his own. I have examined all available records in the Library of Congress, the Folger Library, and the New York Public Library, and have found no other examples of a fort built on the Lane plan, with the bastions on the sides of the basic square rather than on the corners.' John White, governor of Raleigh's second colony, made a drawing of the St. Johns fort, but neither a drawing nor any description of the Roanoke Island fort has ever been found."

"Excavations indicate that the fort was erected with the two

pointed bastions commanding the approach to the site by water; and one of them pointed directly toward a cove. The lopsided, rounded bastion on the south side may have enclosed a small building, either for quarter or supplies. The entrance faces due west, presumably toward the settlement."

"Objects of European origin were found during excavations in the old topsoil under several feet of sand dune, proving beyond a doubt that the dunes in this area were formed after the Raleigh settlement. No concentration was found of cultural material or habitation refuse in any single spot, but there was enough found throughout the trenches dug west of the fort to suggest, in the absence of better evidence, that the settlement lay in that direction."

Mr. Harrington reported that a mine detector on a site such as Fort Raleigh has definite but limited use. After the top layer of each exploratory trench had been removed, taking with it bottle caps and other modern refuse that attracted the detector, it then was useful in the excavations. An indication of metal located along the trench below the top layer of soil was marked by a small stake. Then when the workman reached the point he used a trowel, removing the object with much less element of damage than if a mattock and shovel had been used.

New Scales Can Weigh Mere Puffs of Air

RAHWAY, N. J. — (AP) — The puff of air from a single wave of the hand can be weighed on a new kind of scales developed here at the Merck Institute for Therapeutic Research.

The scales are used to weigh potent new drugs, and to weigh the energy spent by animals under the influence of medicinal drugs.

They can be used in the ordinary way, but take ten seconds to come to rest. This weighing time is cut to a fraction of a second by a new device. A beam of light catches the first downward motion of the loaded tray. The light is changed by a photocell into electricity and a calculator calculates the weight.

In testing medicines on animals, in the past it has been the rule to record the activity that can be picked up from movement of a cage hung on springs. The new scales will substitute for the springs, and weigh each movement of an animal cage. They are expected to weigh the amount of energy in each move.

There are 17 line plowing units being operated by the North Carolina Division of Forestry and Parks, each unit representing a crawler tractor, a fire line plow, and a transport truck.

MOSCOW — (AP) — "Dawn of the East" published a Tass dispatch from Khabarovsk in which it was reported that many new settlers are arriving in the Far East. The people coming to the East to make new homes include collective farmers, tractor men, doctors, teachers, fishermen, and workers of the lumber and coal industries, the dispatch said.

The adding machine was invented by a Frenchman in 1642.

## Archeologist Claims Discovery Of Fort Raleigh Foundation

By Aycock Brown

MAITEO, N. C. — What has become a controversy should now be definitely settled as to where Sir Walter Raleigh's fateful colonists landed during the 16th Century. In the Sunday papers of August 1, a release from the Information Service of the Department of Interior gave this authentic information:

"The outlines of the fort built by Sir Walter Raleigh's lost colonists' at Roanoke Island, N. C. has been definitely located by recent archeological surveys conducted by J. C. Harrington, archeologist of the National Park Service. The site of this, the first English attempt to colonize within the limits of continental United States, is now the Fort Raleigh National Historic Site."

Within a stone's throw of the original fort site today, Paul Green's symphonic drama, THE LOST COLONY, is being presented for its eighth season as one of America's most outstanding outdoor theatrical productions.

The show is presented during July and August and until Labor Day in The Waterside Theatre here each evening (except Monday and Tuesday).

R. H. Atkinson, in charge of Fort Raleigh National Historic site for the Park Service, announced as the Washington story was released that plans are already underway to excavate the site of the original fort and rebuild the same just as it appeared in 1587, insofar as the shape is concerned anyway.

In the story released from Washington, Atkinson pointed out additional data about the recent find. He said:

"A. E. Demaray, acting director of the National Park Service, has reported to the Secretary of the Interior J. A. Krug that the shape of the fort, as indicated by these excavations, resembles the fort built by the colonists at St. Johns Island in Puerto Rico a few weeks before they arrived at Roanoke Island. Demaray quoted Mr. Harrington as saying: 'If the plans of these two forts are compared with the conventional small earth work of the period, it is evident that Governor Ralph Lane, or his fortification expert, had some very definite, but unconventional ideas of his own. I have examined all available records in the Library of Congress, the Folger Library, and the New York Public Library, and have found no other examples of a fort built on the Lane plan, with the bastions on the sides of the basic square rather than on the corners.' John White, governor of Raleigh's second colony, made a drawing of the St. Johns fort, but neither a drawing nor any description of the Roanoke Island fort has ever been found."

"Excavations indicate that the fort was erected with the two

## Danish Government Forbids Weddings With Germans

COPENHAGEN — (AP) — More than 1,000 Danes want to marry German refugees who have been interned in Denmark since the liberation, but not a single permit to marry a German has been given, a spokesman for the ministry of justice said. Several Danish soldiers, with the Danish brigade in Germany, have married German girls. "Nobody can forbid that—but they will never be able to get their wives with them back to Denmark. They will not be given entry permit."

The spokesman said that the strict rules forbidding entry of wives of brigade soldiers are necessitated by the refugee problem. "We cannot press the Allied authorities to help us get rid of the German refugees in Denmark and simultaneously allow German women to settle in Denmark as wives of Danish citizens," he said.

Legion Grows In Philippines

MANILA — (AP) — Reactivated posts of the American Legion in the Philippines have a membership of 1010, highest in history, Marc A. Stice, Philippine department head says. Seven posts are in existence.
