NEWSPAPERS BECOME THE NO. 1 NATIONAL ADVERTISING MEDIUM

National Advertisers Invested \$445,015,000 In Newspaper Advertising In 1949, Making Newspapers The Bigges! National Advertising Medium On The Basis Of How U. S. Manufacturers Divide Their Advertising Dollars.

As newspapermen we're proud of the fourth consecutive all-time high which national advertisers have accorded newspapers by the vote of their advertising dollars.

As most advertising executives know, of course, this is no sudden development, but the product of a steadily growing trend-from \$270,-000,000 in 1946 to \$357,000,000 in 1947-to \$389,-261,000 in 1948 and on to the record \$455,015,000 of 1949. And so far in 1950, the gains are still mounting.

Actually, during the 12 months of 1949 national advertisers invested in newspapers:

MORE THAN TWICE AS MUCH as on all four of the great national radio networks combin-

\$32,000,000 MORE than in all general magazines combined.

AND OVER \$4,000,000 MORE than in all general magazines and all farm magazines put together.

Most important of all, it's clear evidence that advertisers are beginning to manage their admrtising the way they've always directed their salesmen-in accord with the basic marketing principle that all business is local.

IN CARTERET COUNTY, NATIONAL ADVERTISERS **EXCLUSIVELY USE THE**
