

**WITH THE 4-H'ERS**

By HARRY VENTERS  
4-H Advisor

Holidays are over and you are trying to get back to your good study habits after the lay-off. I hope that all of you made some New Year's resolutions that will help you in your school work, such as regular study habits.

I also hope that you have resolved to take more interest in 4-H work, as this also can be very important to you. Four-H training will help to make you good citizens now and in the future.

There is a new 4-H Club record book that some of you will be interested in. A separate 4-H forage crops record book has been prepared and is available to those of you that are interested in a forage crops project.

The need for this type project has been felt for some time. There are increasingly larger numbers of club members who are carrying livestock projects. Since the cost of production has been steadily increasing, I'm sure all of you realize the importance of high quality forage that is grown on the farm.

The forage crop record may be taken as a separate project or you may want to keep this record in addition to the livestock record you are already working on.

The 4-H forage crop record is in two sections, and you can take one section or both. The first section deals with the establishment of annual or perennial forage crops and there are six requirements to complete this section.

They are: (1) Plant one or more acres of ladina clover-fescue, fescue, Kobe or Korean lespedeza, crimson clover, red clover, millet or sudangrass with seed or set coastal bermuda grass sprigs; (2) Select the land, prepare the seed bed, fertilize and cultivate the crop according to extension service recommendations; (3) harvest the crop and determine yield and profit or loss made in the project; (4) select an exhibit and show it at club or community, or county or state fair; (5) keep an accurate record of all labor and materials in carrying out the project and (6) write a story on "How I Grew My Crop".

Section two of the forage crop deals with keeping a maintenance record for perennials. Here you select two or more acres of ladina clover, sericia lespedeza, tall fescue or red clover, depending on the number of animal units in your livestock project, and fertilize and carry out other cultural practices recommended by the extension service. Other requirements for this section are the same as for section one.

Those of you that are interested in this project be sure to let me know at your next club meetings. The Newport 4-H Clubs will meet first this month, on Wednesday, Jan. 8. Atlantic will meet Thursday, Jan. 8. Harkers Island on Friday, Jan. 9. Smyrna will meet next Monday, Jan. 13 and Camp Glenn and Morehead will meet on Tuesday, Jan. 13. Pointers for 4-H boys and girls: A clear skin calls for cleanliness. Mild soap and warm water twice a day is the way.

Most secondary schools in Finland give a "short course" in English and American literature.

**First Day of 1953 Warm, Followed By Freezing Night**

The temperature was a mild 59 degrees as Carteret Countians welcomed in the new year. Wednesday night, the first full night of the year, the temperature plunged to a frigid 31.

Weather observer Stamey Davis reports that no rain was recorded up to 5 p.m. Wednesday. A heavy shower followed on Wednesday night. Maximum and minimum temperatures and wind direction for the week follow:

	Max.	Min.	Wind
Sunday	58	48	NE
Monday	53	39	NNE
Tuesday	58	43	NE
Wednesday	59	45	W
Thursday	.....	31	.....

**Huge Pet**

Long Cove, Nfld. (AP)—Boys from this Trinity Bay community have adopted a pothead whale, caught floundering in shallow water. They dragged the whale to a nearby pond where they feed it fresh fish. The whale seems content.
