# 'Sword of Hope' Shines At Washington, D. C.

Washington, D. C. — Popular North Carolina politico John D. Larkins Jr., chairman of the State Democratic Executive Committee, represented his state here recently at the lighting of a 30-foot "sword of hope" — symbol of the American Cancer Society.

The dramatic ceremonial lighting, which was executed from the stage of the Uptown Theatre at the premier of the motion picture, "South Pacific," climaxed a two-day program of the Cured Cancer Congress, and "kicked off" the 1958 Cancer Crusade with a message of hope.

During the two-day meet, Larkins, himself a cured cancer victim, and some 60 other victors over the dread disease, heard Dr. L. T. Coggeshall, president of the American Cancer Society; Dr. J. R. Heller, director of the National Cancer Institute; Major General Edmond H. Leavay, president of International T&T and 1958 Crusade chairman of the American Cancer Society; and Senator Lister Hill.

In business sessions, the Congress passed a resolution to mobilize cured cancer volunteers for the 1958 Crusade and promote the educational campaign against fear
