Two Housewives 'Get Goods' on Cancer Quacks

By HARRY JUPITER

Bakersfield, Calif. (AP)—There are those, glib of tongue, who profit from the human fear of cancer by claiming to cure the incurable. And there are those with the courage to expose them.

Mrs. Eleanor McKee and Mrs. Claire Schaefer are among the courageous—volunteers in the fight against cancer quackery.

Mrs. McKee, a 34-year-old Woodville farmwife, carries a burn scar on her shoulder from the job she did in gathering evidence against Perle Savely, 79, of Lemoore, Calif.

Mrs. Schaefer, 50, of Bakersfield, executive secretary of the Kern County Cancer Society, went through treatment by a fantastic "ozone machine" to expose Franklin D. Lee, 70, of Bakersfield.

Both convicted
Savely and Lee were convicted of practicing medicine without a license. Savely was fined \$400, placed on probation for two years and ordered to make restitution to his "patients." Lee was jailed for one year.

Mrs. McKee and Mrs. Schaefer met for the first time recently when they were honored in San Francisco by the American Cancer Society for their undercover work.

The quiet-spoken farmwife—the mother of five children—said she had been criticized by some people for her part in exposing Savely. It was so discouraging, she said, she consulted her minister, who "put his arm around me and said he was proud of me."

But there were rewards.
Honored in Editorial
The Tulare Advance—Register wrote an editorial addressing her by name:

"To you goes our nomination as Tulare County's 'woman of the year' for your humanitarian work in exposing a cancer cure 'quack' by exposing yourself to his treatment."

Mrs. Schaefer's greatest reward was even more personal.

"After Lee's trial, I heard of a woman who had planned to go to him," she said.
"She listened to the trial, then went to a regular doctor, who sent her to the county hospital. She's being treated for her ailment. Even if she were the only one—and I'm sure there are more—I feel that whatever I have done was well worthwhile."

Mrs. McKee, whose mother died of cancer, became worried after failing to dissuade a friend from going to Savely. She consulted the California Cancer Society. Agents of the Pure Food and Drug Administration persuaded her to go to Savely's house and show him a non-pigmented mole on her right shoulder.

"I agreed to do what I could, but I certainly didn't know what I was getting into," she said.

Makes 'Diagnosis'
"He reached into a bag and took out a 10-cent magnifying glass—the kind my children often play with—and looked at my shoulder. He frowned and told me I had cancer."
