TB Clinic

(Continued from Page 2, Section 2)partment is in excellent condition."

Young children who are TB contacts should be given the tuberculin test every three months for the first year. Many times the first tuberculin test in them will be negative, for the germ might not have had time to become active. If neglected, the results could really become serious, the health officer said.

Sterility is one of the great fears from repeated x-rays. When x-rays are made in the health department on children, or young adults, a protective shield is used between the patient and x-ray machine. This is a rack covered with lead-lined rubber. It can be raised or lowered according to the height of the patient, to the bottom of ribs, thus preventing any unnecessary x-rays from entering the body.

Dr. Brooks told of a recent admission to the hospital of a child suffering with tubercular meningitis. Upon examination of the contacts in the family, all were negative. Further examination showed the grandmother who had been baby sitting, to have active tuberculosis.

Tuberculosis is contagious; the health of a baby sitter, is very important.

Dr. Fulcher says that tuberculin tests can be done on anyone who will come to the health department clinic on Tuesday at Morehead from 9 to 11 in the morning at the hospital annex; in Beaufort 1 to 4 p.m. at the health department.

If these tests are positive, x-ray clinics are held on Tuesday and Thursday mornings from 9-12 a.m. The cost of the x-rays are \$3, if you are able to pay.

The next clinic will be Aug. 18, at the health department BY APPOINTMENT ONLY. Suspects can be sent to this clinic by any physician. Reports are mailed to each patient's doctor, listing findings or recommendations, following each clinic.

Artist, Dentist Deal, Swap Bridge for Bridge Cedar Rapids, Iowa (AP)—When the late Grant Wood was struggling to get a start as an artist, he went to the office of Dr. B. H. McKeely, a dentist.

He explained he needed some dental work but had no cash available. He offered in payment a painting of a bridge he had made in Paris. The dentist said he guessed that would do.

"Okay," said Wood, "it's a deal, a bridge for a bridge."

Dr. McKeely later became model for the farmer in Grant's painting, American Gothic.
