Automobile Club Tells How to See North Carolina

(Note: The North Carolina State Automobile Association is furnishing newspapers a series of articles on how and where to spend weekends seeing North Carolina. Titled, Weekend on Wheels, No. 4 of the series deals with the Carteret area. It follows).

In the central coastal section of North Carolina, Carteret, Craven and Pamlico Counties bulge out into a fat peninsula with small resorts, both quiet and lively, and waters both calm and brisk.

These resorts make ideal "Weekends on Wheels" for both families and fishermen, report the travel consultants of the N. C. State Motor Club.

Morehead City is one of the truly maritime towns of North Carolina. It is bounded by the Newport River, Bogue Sound and Calicoe Creek—within sight and hearing of the Atlantic Ocean. It is the only North Carolina deep sea port except Wilmington, and its way of living is largely linked with the water, although new industries and commercial activities are rapidly recognizing the advantages of the area and providing a well-rounded and balanced economy.

City Stretches Out The city is stretched out on a three-mile peninsula that juts eastward to the Newport River and the Ocean Port Terminal. Its busy waterfront boasts one of the finest sports fishing charter fleets along the South Atlantic Coast.

With hotels, motels, tourist homes, unsurpassed cuisine, shopping sections, boat and auto service and other facilities, Morehead City is a resort in her own right and is fast becoming a year-round resort. Where the tourist season used to last only about 10 weeks during the summer, it now begins in April and continues through October.

The Cape Lookout area offers sports and recreation every month in the year—fishing, boating, golfing, camping, hunting and bathing. The nearby Gulf Stream offers the finest in deep sea sport for the big fish. Cape Lookout and the inlet, the sound and rivers provide unsurpassed sport for the trollers and bottom fishermen.

Fresh water lakes and the Newport River offer the angler bass and other fresh water species. Cape Lookout is near the geographical center of the North Carolina coast, about 12 miles southeast of Morehead. The Cape Lookout lighthouse has long been a familiar beacon to mariners.

Atlantic Beach Atlantic Beach, reached by bridge, is about two miles from Morehead City, and the life of the two towns is closely related. In the center of the town are beach concessions, and nearby are bath houses, soda shops and an amusement area. Beach hotels, bowling alleys, restaurants and stores com-

March of Dimes Enlarges Program of Research, Care

New York—A program that will permit a scientific assault on major health problems of the nation, with arthritis and birth defects as initial new targets, has been announced by the National Foundation for Infantile Paralysis.

Basil O'Connor, president of the organization that made possible the Salk polio vaccine, outlined its broad new program of future attack on disease and disability at a recent press conference in New York.

While carrying on the winning fight against polio, the National Foundation, as it now will be known, will continue its history-making virus research program and investigations of disorders of the central nervous system, and will add research and patient aid in arthritis and birth defects (congenital malformations), Mr. O'Connor said.

The expanded program will be financed through the traditional March of Dimes conducted each January by volunteers in 3,100 county chapters across the country.

Mr. O'Connor said: "This is our concept for the future: The development of an organized voluntary force in the fields of medical research, patient care and professional education, flexible enough to meet new health problems as they arise, with specific goals initially.

"The heart of the new program is research. Research will be expanded from where it is now, without the restriction of being confined in the future to a single disease. Professional education also will be expanded to cover training of personnel both for research and patient care in all areas of activity."

Slide, Snookie, Slide Pontiac, Ill. (AP)—Snookie is one dog that likes the thrill of a slide board. The blond and white cocker spaniel and his 12-year-old mistress, Barbara Mott, visit Washington Park regularly where the dog climbs up the open steps and slips down the slide about a dozen times a day.
