## Will you leave these freedoms to your children?

- Men have died to leave you these 4 symbols of freedom:
- A Holy Bible—symbol of your right to worship as you wish. (First Amendment, U. S. Constitution)
- A door key—your right to lock your door against illegal government force and prying. (Fourth Amendment, U. S. Constitution)
- A pencil—freedom to speak or write what you think, whether you agree with the government or not. (First Amendment, U. S. Constitution)
- And a free ballot—your right to choose the people who represent you in government—your protection against government tyranny. (Article I, U. S. Constitution)

HALF the world is trying to destroy these 4 symbols and what they stand for. Even in this country, there are people who threaten our freedoms, by trying to give the U. S. government more and more control over American life. They have a start—already the government runs hundreds of different kinds of business in competition with its own citizens. And you read about proposals that government take over even more. The electric light and power business, for example. The federal government runs some of it now. And Congress is being pressed to take over still more. Even though every such step leads down the road to socialism, one thing most Americans don't want. If socialism comes to America this way—step by step—you'll never have a chance to vote for or against it. For by that time, government will control your job, your independence, your thinking. Then what freedoms will you be able to pass on to your children?
