

TRAIL-BLAZING IDEAS

CAMPING OUT IS DEFINITELY "IN" DURING THE SUMMER. BUT STUDY YOUR ROAD MAPS IN ADVANCE. DON'T GUESS ABOUT ROAD DIRECTIONS—ASK. MAKE SURE YOUR CAMPSITE IS WITHIN REASONABLE DISTANCE OF GROCERIES, A DRUG STORE AND A DOCTOR.

FOR TIPLER TO START A FIRE, THE BEST WOODS ARE BIRCH BARK, FINE TWIGS OF WHITE PINE, AND INNER BARK OF CEDAR. TO MAKE SURE A CAMPFIRE IS SAFELY OUT, SPREAD THE EMBERS AND DOUSE THEM THOROUGHLY.

HOT WATER AT CAMPSITES IS "IFFY," SO TAKE ALONG A SUPPLY OF COLD WATER DETERGENT. YOU'LL NEED THE COLD POWER TO KEEP CLOTHES CLEAN, AND MANY HOUSEWIVES ARE EVEN USING IT FOR THE DISHES.

HAVING FUN?

DRINKING AND COOKING WATER SHOULD BE "PURE DELIGHTS." IT CAN BE PURIFIED BY BOILING AT LEAST FIVE MINUTES. YOU CAN COOL IT AND BRING BACK THE NATURAL TASTE BY POURING IT BACK AND FORTH FROM ONE CONTAINER TO ANOTHER.

Wayne Peele In Western Pacific

Boilerman Third Class Wayne C. Peele, son of Mr. and Mrs. Mary H. Dail of 202 E. Peyton Ave., Kinston, is serving aboard the destroyer USS John W. Thomason currently in the Western Pacific.

Now in its four months of operations off the coast of Vietnam, the destroyer has plied guarded for two Seventh Fleet Aircraft Carriers and conducted Anti-submarine warfare exercises with another carrier.

The ship's primary mission is to render rescue assistance to downed pilots.

HOME ECHOES

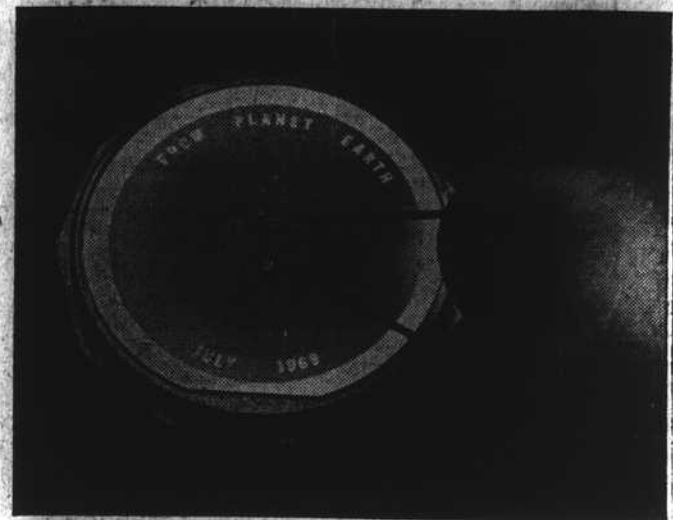

? — How do you store leftover egg yolks or whites? Left-over whites may be stored in a tightly covered jar in the refrigerator. They may be held a week to ten days. Refrigerate leftover yolks with water in a covered container. They may be held two or three days.

? — Can you hold over cooked egg yolks? Cooked egg yolks may be held four or five days in a covered container to avoid drying. They may be used as a garnish or blend with other ingredients for soups, canapes, salads, and sandwiches.

? — Is there anything you can do to improve the appearance of a soft custard that curdled? If this mishap does occur, remove the custard from the heat immediately and beat vigorously until smooth. Do not cook further.

? — How much dill seed do you use in a pickle recipe that calls for dill plant, dried or fresh? According to USDA you may substitute one tablespoon dill seed per quart jar for three heads dill plant, fresh or dried.

? — How much sugar do you use for the sugar pack when freezing blackberries? To one quart (1½ pounds) berries, add ¾ cup sugar. Turn berries over and over until most of the sugar is dissolved.

MICRO-MESSAGES FOR THE MOON from 74 heads of state plus four U.S. documents are contained on this 1½ inch diameter silicon wafer in a Time Capsule left on the moon by the Apollo 11 astronauts.

The messages were reduced to 1/200th of their original size by a new information technology process developed by the Sprague Electric Company Semiconductor Division, Worcester, Mass.

By etching the micro-messages in an ultra-thin, 4-millionths of an inch, quartz (silicon dioxide) coating on the silicon wafer, a record able to withstand the extreme conditions of space will remain permanently on the moon to signify the historic event.

The Sprague process allows the pin-head sized messages to withstand temperatures over 1800°F indefinitely, something far beyond the abilities of microfilm and other previous micro-reproduction techniques.

James R. Rose Gets Army Commission

Second Lieutenant James R. Rose, a 1969 graduate of Wake Forest University, received his Army Reserve commission through the Reserve Officers' Training Corps program at the school June 9.

As an ROTC cadet, Lt. Rose son of Mr. and Mrs. Joseph B. Rose, 2502 Carey Road, Kinston, was trained in various subjects which provided him with the skills necessary to command.

He earned his commission in the Military Police Branch of the Army. His wife is the former Rhonda Barrow, of Kinston.

William Taylor In Germany

Army Second Lieutenant William K. Taylor III, whose parents live at 1207 Anne Drive, Kinston, was assigned as an information officer with Company A, U. S. Army, Europe, and Seventh U. S. Army Special Troops, near Heidelberg, Germany, June 20.

His wife, Bettine, is with him in Germany.

Good Summer Management Can Boost Beef Returns

Special attention to summer management practices can make a favorable situation even better for North Carolina beef Cattle producers.

Enjoying high prices currently and looking forward to a continued strong market into the fall feeder auction season, producers are looking for ways to take full advantage of the market situation.

Fall feeder calf prices may be the highest since 1951 when the average was \$36.88 per hundred pounds. A new record could be set for yearling steers.

Extension animal husbandry specialists at North Carolina State University are offering the following suggestions for summer management:

1. Creep feed calves equal parts by measure of shelled corn and whole oats until market time. Feeder calves are a good way to market grain when cattle prices are high.
2. Rotate pastures to help control internal parasites. If needed, treat calves for worms during July.
3. Control flies during the summer months.
4. The breeding season should be over by now and all bulls removed from the cow herds.
5. Check all calves to see that they are properly dehorned and castrated.
6. Give all cattle free choice to loose salt, a mineral mixture and clean water.
7. Cull cows should be sold in July and August.
8. If calf crop was off this year, it would be a good practice to pregnancy check the entire cow herd and market any cows that are not bred.
9. Plans for renovating old pasture may be in order to improve the quality of next year's grazing.
10. Plan to market feeder calves and yearling steers

through the state graded sales in the fall. It is important that producers consign cattle to the graded sales to provide a dependable supply of good quality feeder cattle for buyers who have supported the sales over the years.

1968 Lenoir County Social Security Benefits Announced

Jerry T. Freeman, Branch Manager of the local social security office announced today that over 5 million dollars was paid in social security benefits to 6,827 residents of Lenoir County during 1968. The average Lenoir County beneficiary received \$772.00 in social security benefits during 1968 on an average monthly payment of \$64.33. These statistics do not include payments made in Lenoir County under hospital or medical insurance parts of Medicare.

Social security benefits are payable to retired or disabled workers and their families. Also payments are made to survivors of deceased workers. For more information about social security call 527-2124 or visit the office located at 810 West Vernon Avenue, Kinston.
