It's hard enough being debilitated by a mental or physical disorder. It's even more distressing to be refused treatment because there are simply too many people vying for too few placements. Your generous contribution will allow us to maintain and expand our services to accommodate more children and adults in desperate need of care. Please help us provide them with the opportunity and the hope to become functional members of our society. Call (919) 832-3909.
