SERVICE (ON-SITE AND CARRY-IN)

When you are ready to upgrade your system by adding more memory, a larger hard drive, or if you simply want the hard drive scanned for viruses, regardless of the manufacturer, rest assure that the workmanship from PC Innovation is second to none.

INTERNET (ISDN OR T1 CONNECTIONS/WEB HOSTING)

A web site affords your business a 24 hour per day presence on the World Wide Web. 24 hour dedicated access (ISDN or a T1 connection) affords your business the ability to have any one of its computers on the Internet 24 hours per day. You can have your own unique host-name and as many e-mail accounts as your growing business needs.

NETWORKS (WAN OR LAN)

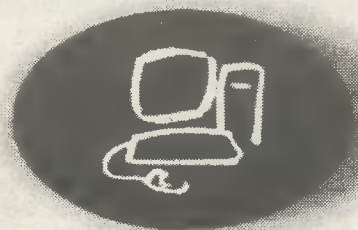

PC Innovation can design, install and manage a network that connects the computers in your office or to other offices in and out of the state. Our staff is experienced in:
 Novell NetWare 3.12, 4.10, 4.11, and IntraNetWare/E LANs and WANS
 Microsoft Windows 95/Workgroups 3.11 LANs
 Microsoft Windows NT v3.51 and v4.0 LANS and WANS
 TCP/IP LANs and WANS of all descriptions
