INSIGHT INTO EYESIGHT

CHRIS MOSHOURES

OPTOMETRIST

SPECTATOR VISION

Only a few can make the big leagues in any sport. However, as a spectator you can enjoy the drama and excitement of sports competition provided you have good vision. If you don't, you can get corrective glasses or contact lenses to make sure you're not missing a thing.

Give yourself a test to make sure. Can you see the players' faces? Can you read the scoreboard? Do you notice any eye fatigue or eye strain when watching a sporting event—even when you're as close as your television screen can bring you? Do you miss key plays and have to wait for the sports announcer to

tell you what happened? These are all signs that you need an eye checkup. Your eyes may have been perfect, but our eyes change with time. Sometimes the focussing muscles are not as strong as they used to be. So don't delay having your eyes examined if you're experiencing any problems with your vision. You'll only be missing more of the action.
