LEGAL NOTICES

**NATIONAL FLOOD INSURANCE PROGRAM
Proposed Flood Elevation Determinations**

AGENCY: Federal Emergency Management Agency
ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100 year) flood elevations shown in your community's preliminary Flood Insurance Study (FIS) and Flood Insurance Rate Map (FIRM). These base (100 year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the community.

ADDRESSES: Study and maps showing the proposed base flood elevations and their delineation are available for review at the Brunswick County Governmental Center, Bolivia, North Carolina.

Send comments to Honorable William D. Carter, Brunswick County Manager, Brunswick County Governmental Center, P.O. Box 249, Bolivia, North Carolina 28422.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matthews, Acting Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, D.C. 20472, (202)287-0760. SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 960, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR Part 67.4 (a).

These elevations, together with the flood plain management measures required by section 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or Federal, State, or Regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 USC 606(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accordance with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not prescribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

Lenses and owners of real property in the Unincorporated Areas of Brunswick County, North Carolina are encouraged to review the preliminary FIS and FIRM available at the address cited above. Proposed base flood elevations along flood sources studied in detail are shown on the flood profiles in the Study. The flood sources studied in detail are:

Table with 4 columns: Source of Flooding, Range of Base Flood Elevations, Depth in feet above ground, Elevation in feet (NGVD).
